Leading Change in Your School Douglas B. Reeves, 2009-04-14 Guiding schools through significant change is one of the toughest challenges educational leaders face but learning from the examples of those who have succeeded can make it less daunting In *Leading Change in Your School* distinguished author and researcher Douglas B Reeves offers lessons learned through his work with educators in thousands of schools around the world and presents real life examples of leaders who have met the challenge of change head on with impressive results for their schools and districts Readers will also find practical resources for engaging their colleagues in change initiatives Expanding on a number of his columns in the journal *Educational Leadership* Reeves offers insights and recommendations in four areas Creating conditions for change including assessments to determine personal and organizational readiness for change Planning change including cautionary notes about strategic planning Implementing change including the importance of moving from rhetoric to day to day reality and Sustaining change including the need to reorient priorities and values so that individual convenience gives way to a shared sense of the greater good The change leaders both teachers and administrators whose stories Reeves tells come from varied districts but they share a passion for creating schools that work for all students They are Reeves says people like you sharing similar challenges but perhaps with different results Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 *Research for Educational Change* presents ways in which educational research can fulfil its commitments to educational

practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research
