Bildung in the Digital Age David Kergel, Michael Paulsen, Jesper Garsdal, Birte Heidkamp-Kergel, 2022-02-06 Bildung in the Digital Age explores the challenges and potentials of digitalization for educational theory and practice and identifies how the

pedagogical concept of Bildung can be used to meet these demands. Discussing the educational landscape of a pandemic and post pandemic world, the book describes how digitalization changes the media foundation of learning and teaching. It further raises questions of how we could think about Bildung in a digitalized world, how Bildung based online teaching and learning can be implemented, and whether it is possible to understand Bildung and its emphasis on individual freedom and self-determination as a counter concept to digital surveillance capitalism. The book will appeal to academics, researchers, and postgraduate students in the fields of digital learning, educational theory, and media education.

Hacking Education in a Digital Age Bryan Smith, Nicholas Ng-A-Fook, Linda Radford, Sarah Smitherman Pratt, 2018-04-01. In this collection, the authors put forth different philosophical conceptions of hacking education in response to the educational, societal, and technological demands of the 21st century. Teacher Educators are encouraged to draw on the collection to rethink how hacking education can be understood simultaneously as a praxis informed by desires for malice as well as a creative site for us to reconsider the possibilities and limitations of teaching and learning in a digital era. How do we hack beyond the limits of circumscribed experiences, regulated subjective encounters with knowledge, and the limits imposed by an ever constrained 21st century schooling system in the hopes of imagining better and more meaningful futures? How do we foster ingenuity and learning as the end itself, and not learning as economic imperative in a world where technology in part positions individuals as zombie-like and as an economic end in itself? Can we hack education in such a way that helps to mitigate the black hat hacking that increasingly lays ruin to individual lives, government agencies, and places of work? How can we as educators facilitate the curricular and pedagogical processes of reclaiming the term hacking so as to remember and remind ourselves that hacking's humble roots are ultimately pedagogical in its very essence? As a collection of theoretical and pedagogical pieces, the chapters in the collection are of value to both scholars and practitioners who share the same passion and commitment to changing, challenging, and reimagining the script that all too often constrains and prescribes particular visions of education. Those who seek to question the nature of teaching and learning and who seek to develop a richer theoretical vocabulary will benefit from the insightful and rich collection of essays presented in this collection. In this regard, the collection offers something for all who might wish to rethink the fundamental dynamics of education or as Morpheus asks of Neo in *The Matrix*: bend the rules of conventional ways of knowing and being.

Educational Research and Innovation: Education in the Digital Age Healthy and Happy Children OECD, 2020-10-15. The COVID 19 pandemic was a forceful reminder that education plays an important role in delivering not just academic learning but also in supporting physical and emotional well-being. Balancing traditional book learning with broader social and personal development means new roles for schools and education more generally.

A New Perspective on Education in the Digital Age Jesper Taekke, Michael Paulsen. This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Drawing together action-based research with sociology of education, media theory, and the

Bildung tradition the authors offer a new perspective on education in the digital age exploring emancipation edification self formation and democratic education The authors draw on 15 years of action based research and weave this with the theory to show how teachers and students might use new media for learning about interaction searching visualizing constructing storing and retrieving The authors show that education needs to be rethought resituated and developed anew in the digital age New norms and new ways of teaching need to be established Building on the theory and case studies they analyze and discuss different strategies ideas and understandings offering four promising ways to develop a new vision for education

E-Pedagogy for the Digital Age Dr. P. C. Nagasubramani, Adult learners have more options for enrolling in postsecondary education than ever before and they are able to use their learning style preference in deciding which program best meets their needs For some of these students those programs are fully online and for others there is minimal use of technology As technology grows and become more integrated into individual lives the unique learning styles and preferences of adults need to learn to be incorporated into instructional design Drawing on a regional sample of US colleges 545 adult learners in a graduate programs were surveyed about how to effectively build community in their online classes Results indicated some agreement with these instructional tools Mature adult learners however were found to have stronger agreement with strategies that included work outside of the formal online class These results suggest perhaps a greater comfort for adults in working in spaces where there is less likelihood of being judged or graded and that they might value relational work with other students in different ways than younger adults

Higher Education in the Digital Age James J. Duderstadt,Daniel E. Atkins,Douglas Van Houweling,2002-12-30 Academic management and administrative processes rely heavily on technology in business offices virtual laboratories digital libraries and the like Technology also has an impact upon teaching freeing classrooms from constraints of time and space Yet many university leaders are hesitant to set technology as a priority This book is designed to address the subject from a perspective appropriate to leaders An important concept covered here is that the new advances in information technology drive a significant restructuring of our social institutions which will provide access to knowledge and education that was formerly restricted to the privileged The generation raised with this technology demands new approaches to teaching and learning this poses a unique challenge to traditional faculty members The authors of this book believe It is our collective challenge as scholars educators and academic

leaders to develop a strategic framework capable of understanding and shaping the impact that this extraordinary technology will have on our institutions They believe that academic institutions will change in form and character and that such changes will affect the mission function and possibly even the concept of the university The role of leadership is to both see over the horizon and adapt leadership styles to an environment of constant change Leadership must formulate a clear and consistent institutional vision
