Abstract: The purpose of this study was to investigate the effect of a 12-week training program on the physical and psychological health of elderly people. The study was conducted in a community center in a city in the north of Iran. The study was a quasi-experimental design with a pre-test and post-test. The study population consisted of 30 elderly people (15 men and 15 women) who were selected by purposive sampling. The study was conducted in a community center in a city in the north of Iran.
