The TV needs to have some sort of lighting source behind it so that the crystals can light up and show a picture. Up until recently a special type of fluorescent bulb was used to light up the crystals. Nowadays, you have your choice of LCD TVs that have this fluorescent bulb, LED bulbs in the back or LED bulbs along the edge of the TV.

LED stands for light-emitting diode and is a different type of lighting source that can be used in TVs. The benefit of using LED lights in a TV is they can add more contrast to the picture because there is an array of lights instead of one single fluorescent bulb. The Report: Egypt 2013 Oxford Business Group, 2013-11-13 The Arab world's second largest economy and its largest population Egypt has endured more than three years of political and economic turbulence which have slowed its performance but its long term fundamentals remain strong Egypt has been through a turbulent time but still manages to churn out headline growth higher than the Eurozone Still an economy that was growing at

a rate of 7% has given way to a more modest GDP expansion of 2.2% in the 2011-12 fiscal year following the ousting of Mubarak while foreign direct investment fell by two thirds over the same period. The figures are likely to remain subdued in the near term but there have been some improvements in cyclical performance particularly with the country's capital markets as 2012 saw Egypt's exchange grow by 51% year on year. More importantly the country still benefits from significant competitive advantages including a strong trade profile, a large private sector, a sizable manufacturing base and favourable demographics.

The Biopolitics of Lifestyle Christopher Mayes, 2015-12-22. A growing sense of urgency over obesity at the national and international level has led to a proliferation of medical and non-medical interventions into the daily lives of individuals and populations. This work focuses on the biopolitical use of lifestyle to govern individual choice and secure population health from the threat of obesity. The characterization of obesity as a threat to society caused by the cumulative effect of individual lifestyles has led to the politicization of daily choices, habits and practices as potential threats. This book critically examines these unquestioned assumptions about obesity and lifestyle and their relation to wider debates surrounding neoliberal governmentality, biopolitical regulation of populations, discipline of bodies and the possibility of community resistance. The rationale for this book follows Michel Foucault's approach of problematization, addressing the way lifestyle is problematized as a biopolitical domain in neoliberal societies. Mayes argues that in response to the threat of obesity, lifestyle has emerged as a network of disparate knowledges, relations and practices through which individuals are governed toward the security of the population's health. Although a central focus is government health campaigns, this volume demonstrates that the network of lifestyle emanates from a variety of overlapping domains and disciplines including public health, clinical medicine, media, entertainment, school programs, advertising, sociology and ethics. This book offers a timely critique of the continued interventions into the lives of individuals and communities by government agencies, private industries, medical and non-medical experts in the name of health and population security and will be of interest to students and scholars of critical
