No. of seedlings	4	3	$x-2$	x	y	$y-12$

The table shows the height (cm) of 50 seedlings in a garden. Given that the mean height of the seedlings is 4 cm, find the

- values of x and y ;
- median height.

11. (a) A bus has petrol tank in the shape of a cylinder. The cylinder is 125 cm high and has a diameter of 42 cm.
- How much will a full tank of petrol cost at the rate of GH¢ 5.50 per litre?
 - If the bus uses petrol at the rate of 12.5 litres for every 50 km, how far can the bus travel on a full tank of petrol?
- (b) The interior angle of a regular polygon is x . If x is 9° less than the of 153° and 143° , find the number of sides of the polygon.

12. (a) A bag contains 18 balls that differ only in colour, 10 are blue and 7 are red. If two balls are picked, one after the other without replacement, find the probability that both are
- blue;
 - of same colour;
 - of different colour.

- (b) If $\cos \theta = 0.8$, $0^\circ < \theta < 90^\circ$, find the value of $\frac{4 \sin \theta}{\cos \theta - \sin \theta}$.

13. (a) The radius and slant height of a right circular cone are 9 cm and 15 cm respectively. Find, correct to one decimal place, the
- height;
 - volume of the cone.

(b)

Non-Linear Perspectives on Teacher Development Kathryn J. Strom, Tammy Mills, Linda Abrams, 2023-03-21 Despite the multifaceted complexity of teaching dominant perspectives conceptualize teacher development in linear dualistic transactional human centric ways The authors in this book offer non linear alternatives by drawing on a continuum of complex perspectives including CHAT complexity theory actor network theory indigenous studies rhizomatics and posthuman neomaterialisms The chapters included here illuminate how different ways of thinking can help us better examine how teachers learn relationally with human material and discursive elements and offer ways to understand the entangled nature of the relationship between that learning and what emerges in classroom instructional practice They also present situated illustrations of what those entanglements or assemblages look like in the preservice induction and inservice phases from early childhood to secondary settings and across multiple continents Authors provide evidence that research on teacher development should focus on process as much if not more than product and show that complexity perspectives can support forward thinking assets based pedagogies Methodologically the chapters encourage conceptual creativity and expansion and support an argument for blurring theory method and normalising methodological hybridity Ultimately this book provides conceptual theoretical and methodological tools to understand current educational conditions in late capitalism and imagine otherwise It was originally published as a special issue of the journal Professional Development in Education

Climate Justice and the Economy Stefan Gaarsmand Jacobsen, 2018-05-15 As climate change has increasingly become the main focus of environmentalist activism since the late 1990s the global economic drivers of CO2 emissions are now a major concern for

radical greens In turn the emphasis on connected crises in both natural and social systems has attracted more activists to the Climate Justice movement and created a common cause between activists from the Global South and North In the absence of a pervasive narrative of transnational or socialist economic planning to prevent catastrophic climate change these activists have been eager to engage with advanced knowledge and ideas on political and economic structures that diminish risks and allow for new climate agency This book breaks new ground by investigating what kind of economy the Climate Justice movement is calling for us to build and how the struggle for economic change has unfolded so far Examining ecological debt just transition indigenous ecologies social ecology community economies and divestment among other topics the authors provide a critical assessment and a common ground for future debate on economic innovation via social mobilization Taking a transdisciplinary approach that synthesizes political economy history theory and ethnography this volume will be of great interest to students and scholars of climate justice environmental politics and policy environmental economics and sustainable development

 Iliada Elia,Joanne Mulligan,Ann Anderson,Anna Baccaglini-Frank,Christiane Benz,2018-02-21 This book brings together a
 collection of research based papers on current issues in early childhood mathematics education that were presented in the
 Topic Study Group 1 TSG 1 at the 13th International Congress on Mathematical Education ICME 13 held at the University of
 Hamburg in 2016 It will help readers understand a range of key issues that early childhood mathematics educators
 encounter today Research on early childhood mathematics education has grown in recent years due in part to the well
 documented positive relation between children s early mathematical knowledge and their later mathematics learning and to
 the considerable emphasis many countries are now placing on preschool education The book addresses a number of central
 questions including What is mathematical structural development and how can we promote it in early childhood How can
 multimodality and embodiment contribute to early mathematics learning and to acquiring a better understanding of young
 children s mathematical development How can children s informal mathematics related experiences affect instruction and
 children s learning in different mathematics content areas What is the role of tools including technology and picture books in
 supporting early mathematics learning What are the challenges in early childhood mathematics education for teachers
