Wellposedness of Second Order Master Equations for Mean Field Games with Nonsmooth Data Chenchen Mou, Jianfeng Zhang, 2024-12-13 [View the abstract](#)

The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools

Structural and Technological Transformation of Education in the Post-Pandemic Period Alexei L. Semenov, Vadim V. Grinshkun, Svetlana N. Dvoryatkina, Vladimir A. Faerman, 2025-03-27 Covering both pre university and university levels this book addresses the challenges and adaptations in mathematics education during the pandemic The book *Structural and Technological Transformation of Education in the Post Pandemic Period* critically examines the changes in STEM education particularly in mathematics and computer science prompted by the COVID 19 pandemic It presents innovative methodologies that incorporate technology into teaching highlighting the role of ICT in enhancing learning experiences The focus is on hybrid intelligent systems and data driven assessment methods that personalize learning and improve educational outcomes Solutions discussed include the implementation of blended learning models fostering critical thinking through complex tasks and using historical contexts to deepen mathematical understanding This edition serves as a valuable resource for educators policymakers and students aspiring to teach in STEM fields providing insights into the evolving educational landscape

Macroeconomic Analysis and Parametric Control of a Regional Economic Union Abdykappar A. Ashimov, Yuriy V. Borovskiy, Dmitry A. Novikov, Bakyt T. Sultanov, Mukhit A. Onalbekov, 2020-02-13 This book is a further development of the theory of parametric control It includes numerical methods of testing verification of

software implementation of mathematical models by assessing the stability of mappings defined by the model sufficient conditions for the existence of the solutions of some types of problems of dynamic optimization the existence of continuous dependence of optimal values of criteria on exogenous functions and parameters and the existence of points of bifurcation of extremals of such problems It demonstrates that this theory offers a constructive methodology for middle term forecasting macroeconomic analysis and estimation of optimal values of economic characteristics on the basis of advanced global mathematical models namely Computable General Equilibrium CGE Model Dynamic Stochastic General Equilibrium DSGE Model and Hybrid Econometric model In addition it includes conditions for the applicability of the computational experiments results into practice

Hello World Hannah Fry, 2018-09-18 Shortlisted for the 2018 Baillie Gifford Prize and the 2018 Royal Society Investment Science Book Prize A beautifully accessible guide One of the best books yet written on data and algorithms Times UK If you were accused of a crime who would you rather decide your sentence a mathematically consistent algorithm incapable of empathy or a compassionate human judge prone to bias and error What if you want to buy a driverless car and must choose between one programmed to save as many lives as possible and another that prioritizes the lives of its own passengers And would you agree to share your family's full medical history if you were told that it would help researchers find a cure for cancer These are just some of the dilemmas that we are beginning to face as we approach the age of the algorithm when it feels as if the machines reign supreme Already these lines of code are telling us what to watch where to go whom to date and even whom to send to jail But as we rely on algorithms to automate big important decisions in crime justice healthcare transportation and money they raise questions about what we want our world to look like What matters most Helping doctors with diagnosis or preserving privacy Protecting victims of crime or preventing innocent people being falsely accused *Hello World* takes us on a tour through the good the bad and the downright ugly of the algorithms that surround us on a daily basis Mathematician Hannah Fry reveals their inner workings showing us how algorithms are written and implemented and demonstrates the ways in which human bias can literally be written into the code By weaving in relatable real world stories with accessible explanations of the underlying mathematics that power algorithms *Hello World* helps us to determine their power expose their limitations and examine whether they really are improvement on the human systems they replace
