Bransford, 2009 Critics within and outside the field of education often point out the absence of a strong reciprocal connection between research and practice The emergence of standards based reform and the passage of NCLB have generated increasing pressure for evidence based decision making at all levels Yet there is little clarity about how research results are actually used in education or what kinds of evidence are most useful to practitioners and policymakers In this book leading scholars in the field examine the culture incentives and opportunities that shape the decision making practices of educational professionals teachers administrators and policymakers as well as individuals intermediary organizations and private sector groups who engage in and disseminate research The authors explore the multiple ways in which research or the lack of it influences the quality of instruction both directly and indirectly They identify strategies for making researching and development a more vital and relevant part of educational decision making and provide suggestions for strengthening the research to practice pipeline Part description and part prescription the book maps out avenues for important changes in education research policy and practice With all the fuss about evidence based decision making *The Role of Research in Educational Improvement* makes a stellar contribution The chapters cover the full range of issues from federal state district and school levels In each case instruction is the focus This invaluable resource at once comprehensive and focused unravels the mystery of research and makes it accessible A great read whether you are in the schoolhouse or the statehouse Michael Fullan Ontario Institute for Studies in Education University of Toronto Turn a gaggle of scholars loose on a vital subject the relation of education research to education practice and if you are lucky you get a collection like this It draws on the authors long experience and reams of research to provide lessons worth pondering by everybody from the Congress to the classroom
