*Still Not Equal* M. Christopher Brown,2007

Still Not Equal Expanding Educational Opportunity in Society addresses the successes and failures of Brown v Board of Education and the Civil Rights Act of 1964 as well as the continuing challenge of expanding educational opportunity in the United States and across the Black diaspora

The educational political and social influence resulting from Brown the Civil Rights Act and their progeny have shaped the dynamics of the collective educational and social experiences of people of color

Notwithstanding the obstacles barriers and enablers of educational occupational and economic status outcomes impact the formation and interpretation of public policy specifically and public perception generally about racialized notions of schooling and learning

The pursuit of educational access attendance and attainment is intertwined with the implications of academic research and public policy to improve local practices in school settings

Inasmuch as a diverse research agenda priorities and activities become situated to critically address status and attainment outcomes in education from preschool through adulthood for African Americans in the United States and abroad the resulting complexities in education and other settings will continue to behave in ways that cross racial lines
