Learn The History Education Of History:

Why Learn History (When It's Already on Your Phone) Sam Wineburg, 2018-09-17 A look at how to teach history in the age of easily accessible but not always reliable information Let's start with two truths about our era that are so inescapable as to have become clichés We are surrounded by more readily available information than ever before And a huge percent of it is inaccurate Some of the bad info is well meaning but ignorant Some of it is deliberately deceptive All of it is pernicious With the Internet at our fingertips what's a teacher of history to do In *Why Learn History When It's Already on Your Phone* professor Sam Wineburg has the answers beginning with this We can't stick to the same old read the chapter answer the question snoozefest If we want to educate citizens who can separate fact from fake we have to equip them with new tools Historical thinking Wineburg shows has nothing to do with the ability to memorize facts Instead it's an orientation to the world that cultivates reasoned skepticism and counters our tendency to confirm our biases Wineburg lays out a mine filled landscape but one that with care attention and awareness we can learn to navigate The future of the past may rest on our screens But its fate rests in our hands Praise for *Why Learn History When It's Already on Your Phone* If every K 12 teacher of history and social studies read just three chapters of this book Crazy for History Changing History One Classroom at a Time and Why Google Can't Save Us the ensuing transformation of our populace would save our democracy James W Lowen author of *Lies My Teacher Told Me* and *Teaching What Really Happened* A sobering and urgent report from the leading expert on how American history is taught in the nation's schools A bracing edifying and vital book Jill Lepore New Yorker staff writer and author of *These Truths* Wineburg is a true innovator who has thought more deeply about the relevance of history to the Internet and vice versa than any other scholar I know Anyone interested in the uses and abuses of history today has a duty to read this book Niall Ferguson senior fellow Hoover Institution and author of *The Ascent of Money* and *Civilization*

Teaching History at University Alan Booth, Jeremy Black, 2003 Drawing on a wide range of international research reflections and experiences of university historians this book links theory and practice and examines how high quality history teaching and learning can be achieved today in universities world wide

[The Idea of an Historical Education](#) Geoffrey Partington, 1980 Considering questions about history schooling this book asks whether history is too hard for children whether it involves too much rote learning and whether there is too much emphasis on specific events rather than wider concepts

In Search of America's Past Bruce VanSledright, 2002-04-12 Offers alternatives to conventional textbook learning for history students describing the use of in depth historical projects and investigations that result in better retention of knowledge

History Education and Historical Inquiry Bob Bain, Arthur Chapman, Alison Kitson, Tamara Shreiner, 2024-04-01 Inquiry plays a vital role in history as a discipline which constructs knowledge about the past and it is a vital organizing principle in history education in many countries around the world Inquiry is also much debated however and although it has prominent contemporary advocates around the world it also has prominent critics in education studies This

volume in the International Review of History Education explores the role of historical inquiry in history curricula and in history classrooms and addresses a series of linked questions including the following What does historical inquiry mean in history classrooms What forms does classroom based historical inquiry take and to what extent is it understood in differing ways in different contexts What do we know about the affordances and constraints associated with inquiry based learning in history what is the evidence of the effectiveness or ineffectiveness of inquiry based historical learning We address these questions in the volume by presenting seventeen papers from eight different international contexts exploring historical inquiry that will be of interest both to history teachers curriculum designers and history education researchers seven papers from England three from the US two from Sweden and one each from Argentina Australia Belgium Canada and Singapore The volume adds to our knowledge about teachers thinking about inquiry and teachers inquiry practices It adds to our knowledge about the impact and value of inquiry in developing children s historical learning It also explores the challenges that implementing inquiry can present for history teachers and provides support for implementation and examples of successful practice

ENDORSEMENT A wonderful overview of the global story of historical inquiry Canvassing everything from finding opportunities to teach history through all levels of education through to the complexities of navigating different views on the past inside and outside of the classroom History Education and Historical Inquiry provides a practical and empowering approach for educators around the world Recommended reading for anyone who wants to feel the support of educators from around the world in strengthening the place of inquiry in complex times Marnie Hughes Warrington University of South Australia

[Learn the History](#) Peter Richardson,2015-01-06 As parents we are in the best position to encourage our children s natural interest in history It is to us they address their first historical questions Where did I come from and Was I always here These two questions contain the two main meanings of history it is the story of people and events and it is the record of times past Follow this guide

Teaching History for the Common Good Keith C. Barton,Linda S. Levstik,2004-07-13 In Teaching History for the Common Good Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation s children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes

and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In *Teaching History for the Common Good* Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children s and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose *Teaching History for the Common Good* is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject

The Teaching American History Project Rachel G. Ragland, Kelly A. Woestman, 2010-05-26 This collection of essays and research reports from participants in The Teaching American History Project provides models for historians teachers teacher educators and others interested in the teaching and learning of American History and presents examples of lessons learned from a cross section of TAH projects

Teaching and Learning in History Ola Hallden, 2012-10-12 Research on history instruction and learning is emerging as an exciting new field of inquiry The editors prepared this volume because the field is at an important moment in its development a stage where there is research of sufficient depth and breadth to warrant a collection of representative pieces The field of research on history teaching and learning connects with both traditional research on social studies and with recent cognitive analyses of domains such as mathematics and physics However the newer research goes beyond these activities as well Where traditional research approaches to social studies instruction and learning have focused on curriculum they have avoided the study of purely disciplinary features the textual components of history and the concomitant demands as well as the nature of various learners Where recent cognitive analyses of mathematics and physics have dealt with misconceptions and knowledge construction they have avoided topics such as perspective taking interpretation and rhetorical layerings The new work by contrast has been concerned with these issues as well as the careful analyses of the nature of historical tasks and the nature of disciplinary and instructional explanations The lines of research presented in these chapters are both compelling and diverse and include a range of topical questions such as What affects the quality of teaching How are historical documents interpreted in the writing of history How is history explained What are the classroom demands on an elementary school social studies teacher What does text accomplish or fail to accomplish in educational settings How do teachers think about particular topics for history teaching Although much of the research reflects a grounding in or the influence of cognitive psychology not all of it derives from that tradition Traditions of rhetoric curriculum analysis and developmental psychology are also woven throughout the chapters The editors envision this volume as a contribution to educational research in a subject matter and as a tool for practitioners concerned with the improvement of instruction in history They also anticipate that it will contribute to cognitive science

MasterClass in History Education Christine Counsell, Katharine Burn, Arthur Chapman, 2016-10-06 MasterClass in History Education draws on international research and practice to present effective and engaging approaches for history teachers who want to explore the ways in which reading research and reflection can support the development of history teaching and learning in the classroom At the heart of the book is a series of professional enquiries carried out by experienced history teachers working in a range of contexts Each history teacher addresses clear questions arising from their practice and together they illustrate various approaches to data collection data analysis and argument These history teachers also show how they drew on diverse scholarship in history and history education including many publications by other history teachers In eight further chapters

other experts ranging from practitioner scholars to researchers in diverse fields such as history history education teacher education teacher research and curriculum theory reflect on the distinctive insights that these teachers offer and explore connections with their own fields The combination of perspectives and the depth of knowledge of the varied contributors reveal the importance of different kinds of relationship between theory and practice The links between classroom realities and research and the critical use of different kinds of text will support history teachers in developing their practice and professional voice

The Challenge of Rethinking History Education Bruce VanSledright,2010-09-13 In The Challenge of Rethinking History Education Bruce A VanSledright argues for a more inquiry oriented approach to history teaching and learning that fosters a sense of citizenship through the critical skills of historical investigation

International Review of History Education Alaric Dickinson,Peter Gordon,Peter Lee,2013-05-13 The third volume in this international review takes raising standards as its central theme Raising standards is no simple matter either conceptually or empirically whatever politicians might think If it is to happen it must draw on research and practical experience from other countries

Helping Your Child Learn History Elaine Wrisley Reed,1993

Learning to Teach History in the Secondary School Terry Haydn,Alison Stephen,James Arthur,Martin Hunt,2012-11-12 In some hands history can be an inspirational and rewarding subject yet in others it can seem dry and of little relevance The aim of this textbook is to enable student teachers to learn to teach history in a way that pupils will find interesting enjoyable and purposeful It incorporates a wide range of ideas about the teaching of history with practical suggestions for classroom practice This is the third edition of a textbook that has established itself as the leading text for student teachers of history It has been thoroughly updated with a revised chapter on the use of ICT in history teaching and major new sections in the areas of inclusion resources assessment and professional development It provides an array of references and materials that give a sound theoretical foundation for the teaching of history including weblinks to further resources A range of tasks enable students to put their learning into practice in the classroom The book also provides reference and access to a wide range of recent and relevant research in the field of history education which will be of use to student teachers pursuing courses that have a Masters Level component In all it is an invaluable resource for student and beginning history teachers

The Learning of History D. G. Watts,2016-04-14 Originally published in 1972 this book is a systematic analysis of the objectives and methods of history teaching The book considers the criticisms of the 1960s and 70s of history as a subject and the pressures for its replacement in the school curriculum It examines the complex psychological background of learning history and suggests that historical understanding makes an important contribution to cognitive growth It also stresses the important part played by historical material in the emotional and imaginative life of the child Concluding with a discussion of practical classroom methods the author proposes objectives and characteristic concepts of

the subject which may be embodied in all levels of teaching **Understanding History** Rosalyn Ashby, Peter Gordon, Peter Lee, 2005-01 What sense do children and young people make of history How do they cope with competing historical accounts in textbooks How do they think historical or archaeological claims are supported or rejected And whatever students think about history how do their teachers see history education The contributors to this fourth volume of the International Review of History Education discuss these questions in the context of their research Divided into two sections the first part of the book examines students ideas about the discipline of history and the knowledge it produces The second part looks in detail at teachers own ideas about teaching Featuring contributions from authors throughout the world including the USA Canada Portugal Brazil Taiwan and the UK the book provides interesting studies of how history is both taught and received in these different countries Understanding History contributes to current knowledge of successful teaching that teachers must take into accounts students preconceptions that they bring to the classroom as well as accepting the complexity and importance of their own professional knowledge The book will be of interest to anyone studying or researching history education as well as teachers of history throughout the world *Teaching History Creatively* Hilary Cooper, 2016-11-09 Where teaching was less effective it was found that learning was passive without challenge or clear goals and so with limited progression There is also a generally perceived need for more creative approaches to a broader primary curriculum as reports warn of the winnowing out of fun in teaching pedagogies This book tackles both issues head on introducing teachers to the wealth of available approaches to historical enquiry which will ensure creative effective learning
