

Leica Gs14 Manual

Sabine Zange

Leica Gs14 Manual:

The influence of medieval building activity on relief development within the Spessart uplands, Germany Julian Trappe, 2022-11-21 In the Spessart a low mountain range in central Germany a feud during the Middle Ages led to the construction of numerous castles in this region This study analyzes the mutual influence of paleo relief development and medieval building activity using a geomorphological and geoarchaeological multimethod approach to expand the knowledge of human environmental interactions during this time For this purpose GIS based terrain analysis and geophysical measurements were conducted and combined with sedimentological information to create 1D 3D models of the subsurface and to assess knowledge of the landscape and relief evolution at various medieval castle and mining sites The interpretation of all these data led to the answering of numerous site specific questions on various geomorphological geoarchaeological geologic and archaeological topics that have been explored in this work and have greatly increased our knowledge of each study site In addition to these key contributions to the archaeological and geomorphological interpretation of individual study sites a quantification of the anthropogenic influence on the relief development was conducted a generalized model of the influence was derived and new methodological and interpretative approaches were developed Overall this study links geomorphological geological and geo archaeological investigations at five medieval sites and delivers important information on human environmental interactions within the Spessart and beyond
