

High Resolution True Day/Night Box Camera QUICK START GUIDE

This camera is the ideal solution for security and surveillance needs. It provides excellent quality even in low-light conditions, features zone blocking to safeguard your privacy, and remote control via an RS-485 port.

Name and Function of Parts

Mounting Your Camera

Your camera can be mounted from the top or bottom, either on a bracket or tripod. The mounting points accept standard photographic mounting bolts (1/4" BSW or 20 UNF).

The mounting bracket must be capable of supporting the camera and the lens.

Should the lens be substantially heavier than the camera, it is recommended to use the mounting point on the lens itself.

NOTE: Ensure the bracket anchors and mounting surface can support the load of the camera and bracket.

Installing Lenses

Before installing a lens, you must first remove the lens cover from the camera. If mounting a C-Mount lens, attach the spacer ring to the camera.

Installing Fixed and Manual Lenses

1. If using a C-mount lens, slide the back focus adjustment fully to the left with the lens facing towards you (see Setting the Focus).
2. Screw the lens on to the camera.
3. Ensure the electronic iris and automatic gain control are both ON.
4. If the lens has an iris, open this fully.
5. If the lens has a focusing ring fitted, set it to infinity (∞) and then adjust the back focus.
6. If the lens has an iris, close according to the required depth of field.

Setting the Focus

To adjust the image focus, there is a back focus adjustment mechanism located at the front of the camera, above the lens. If a C-Mount lens is to be used on the camera, the supplied adaptor ring should be mounted to the camera first. Failure to do this may cause damage to the IR Cut filter mechanism and CCD.

Use the following procedure to adjust the focus:

1. Unscrew (loosen) the back focus adjustment lock screw.
2. Slide the focus adjustment to the left (if facing the lens) to move the CCD sensor away from the back of the lens or to the right to move the CCD sensor towards the back of the lens.
3. Tighten the screw to lock the back focus adjustment in place.

Connecting

Connecting to a Power Supply

Mains Power Supply: This camera operates directly from the mains supply and is supplied with a detachable power supply cord. The operating voltage is 100~250VAC.

Low Voltage Power Supply: This camera operates between 11~25 VDC and 20~29VAC. Connections are indicated above the terminals on the rear panel of the camera. The power supply must be a UL listed class 2 type.

The power LED on the rear panel is lit when the camera is connected to a power source.

NOTE: The typical power consumption of a camera is less than 5 Watts.

Connecting to a TV / Video

Connect a video coaxial cable terminated with a 75 Ω BNC connector to the BNC socket labeled VIDEO-OUT. Connect the other end of the cable to the VIDEO IN socket of your video or television equipment.
