Lg Shine Users Guide:

Estimating Stability Class in the Field Leonidas G. Lavdas, 1997 **Polypropylene** Clive Maier, Theresa Calafut, 1998-04-15 Polypropylene The Definitive User's Guide and Databook presents in a single volume a panoramic and up to the minute user's guide for today's most important thermoplastic. The book examines every aspect: science, technology, engineering, properties, design, processing, applications of the continuing development and use of polypropylene. The unique treatment means that specialists can not only find what they want but for the first time can relate to and understand the needs and requirements of others in the product development chain. The entire work is underpinned by very extensive collections of property data that allow the reader to put the information to real industrial and commercial use. Despite the preeminence and unrivaled versatility of polypropylene as a thermoplastic material, to manufacture relatively few books have been devoted to its study. Polypropylene The Definitive User's Guide and Databook not only fills the gap but breaks new ground in doing so. Polypropylene is the most popular thermoplastic in use today and still one of the fastest growing. Polypropylene The Definitive User's Guide and Databook is the complete workbook and reference resource for all those who work with the material. Its comprehensive scope uniquely caters to polymer scientists, plastics engineers, processing technologists, product designers, machinery and mold makers, product managers, end users, researchers, and students alike.

Numerical Modeling of the Global Atmosphere in the Climate System Philip Mote, Alan O'Neill, 2000-04-30 21

PREFACE Numerical modeling of the global atmosphere has entered a new era. Whereas atmospheric modeling was once the domain of a few research units at universities or government laboratories, it can now be performed almost anywhere thanks to the affordability of computing power. Atmospheric general circulation models (GCMs) are being used by a rapidly growing scientific community in a wide range of applications. With widespread interest in anthropogenic climate change, GCMs have a role also in informing policy discussions. Many of the scientists using GCMs have backgrounds in fields other than atmospheric sciences and may be unaware of how GCMs are constructed. Recognizing this explosion in the application of GCMs, we organized a two-week course in order to give young scientists who are relatively new to the field of atmospheric modeling a thorough grounding in the basic principles on which GCMs are constructed, an insight into their strengths and weaknesses, and guidance on how meaningful numerical experiments are formulated and analyzed. Sponsored by the North Atlantic Treaty Organization (NATO) and other institutions, this Advanced Study Institute (ASI) took place May 25-June 5, 1998, at Il Ciocco, a remote hotel on a Tuscan hillside in Italy.
