## **Mathematical Literacy September 2014 Memo:**

*An Age of Accountability* John L. Rury, 2023-10-13 *An Age of Accountability* highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Digital Samaritans Jim Ridolfo, 2015-09-16 *Digital Samaritans* explores rhetorical delivery and cultural sovereignty in the digital humanities The exigence for the book is rooted in a practical digital humanities project based on the digitization of manuscripts in diaspora for the Samaritan community the smallest religious ethnic group of 770 Samaritans split between Mount Gerizim in the Palestinian Authority and in Holon Israel Based on interviews with members of the Samaritan community and archival research *Digital Samaritans* explores what some Samaritans want from their diaspora of manuscripts and how their rhetorical goals and objectives relate to the contemporary existential and rhetorical situation of the Samaritans as a living breathing people How does the circulation of Samaritan manuscripts especially in digital environments relate to their rhetorical circumstances and future goals and objectives to communicate their unique cultural history and religious identity to their neighbors and the world *Digital Samaritans* takes up these questions and more as it presents a case for collaboration and engaged scholarship situated at the intersection of rhetorical studies and the digital humanities

King and other key figures from Montgomery to Memphis demonstrating that Gandhian nonviolence was a philosophy of active not passive resistance involving the bold and sustained confrontation of the Movement's adversaries both on the ground and in the court of public opinion While bringing legends such as Fannie Lou Hamer and John Lewis into new focus Ricks also highlights lesser known figures who played critical roles in fashioning nonviolence into an effective tool the activists James Lawson James Bevel Diane Nash and Septima Clark foremost among them He also offers a new understanding of the Movement's later difficulties as internal disputes and white backlash intensified Rich with fresh interpretations of familiar events and overlooked aspects of America's civil rights struggle *Waging a Good War* is an indispensable addition to the literature of racial justice and social change and one that offers vital lessons for our own time      **Developing Deep**
