Silent Partners Amy M. Froide, 2016-10-06 Silent Partners restores women to their place in the story of England's Financial Revolution Women were active participants in London's first stock market beginning in the 1690s and continuing through the eighteenth century Whether playing the state lottery investing in government funds for retirement or speculating in company stocks women regularly comprised between a fifth and a third of public investors These female investors ranged from London servants to middling tradeswomen up to provincial gentlewomen and peeresses of the realm Amy Froide finds that there was no single female investor type rather some women ran risks and speculated in stocks

while others sought out low risk low return options for their retirement years Not only did women invest for themselves their financial knowledge and ability meant that family members often relied on wives sisters and aunts to act as their investing agents Moreover women s investing not only benefitted themselves and their families it also aided the nation Women s capital was a critical component of Britain s rise to economic military and colonial dominance in the eighteenth century Focusing on the period between 1690 and 1750 and utilizing women s account books and financial correspondence as well as the records of joint stock companies the Bank of England and the Exchequer Silent Partners provides the first comprehensive overview of the significant role women played in the birth of financial capitalism in Britain **Handbook of**
