Starr, 2022-08-23 With a visionary approach to school improvement Equity Based Leadership proposes a framework to support system leaders seeking to organize change and achieve more equitable education In this ambitious yet pragmatic work Joshua P Starr makes the case that intentional and attentive district leadership can bring about continuous improvement in schools When district reforms are conceived with social justice in mind Starr explains schools move toward fulfilling the longstanding promise of equitable education in America Starr asserts that the essential goal of good system leadership lies in designing implementing and sustaining comprehensive strategies for school reform in collaboration with school leaders educators and community shareholders Drawing on his own experiences and those of other distinguished superintendents he offers core practices that system leaders can use to ensure that the mission of their district is upheld throughout any change process and that precious time and funding are used judiciously Recognizing that there is no single path to transformation Starr sets forth a flexible customizable agenda for district reform that concentrates on six elements or entry points Starr s first entry point is curriculum content as teaching and learning are the fundamental goals of a school system But he goes further to advocate for a deep dive into the organization and alignment of the system itself via deliberate support of shared values explicit and transparent decision making resource allocation in line with vision and need talent management to achieve new levels of educator performance and nourishment of school culture Additionally Starr brings together a wide range of real world examples evidence based practices and sensible advice to guide district leaders in aligning their systems around a coherent equity strategy This bold new approach to transforming educational systems confidently guides the higher level decision making of leaders not only superintendents but also school board members cabinet members and central office administrators within the context of district wide efforts to make education better for all students **Understanding**

Management in China Malcolm Warner, 2013-11-12 China has become one of the fastest growing economies ever seen in the world in recent times In the last three decades China has transformed itself from a command economy to a market one albeit a nominally socialist one and its management systems have been reformed accordingly In the light of these changes Malcolm Warner one of the leading authorities on management in China explores the past present and future of Chinese management The first part of the work examines the history of management practices in the Middle Kingdom outlining the influence of traditional Chinese values especially the Confucian inheritance and the legacy of the imperial bureaucracy with its meritocratic examination system as well as the role of industrialization and the influx of foreign owned businesses in the

late nineteenth century and the twentieth century It next goes on to consider the current state of China s management showing how a new breed of manager has evolved since the beginning of Deng Xiaoping s reforms in the late 1970s and 1980s The resulting impact of this strategy which has continued into the 1990s and the 2000s up to the present day is then examined The final part of the book concludes with reflections on how management in China is likely to develop in the near future especially on how far it will converge with global practices or to what degree an indigenous form of management with Chinese characteristics will prevail
