1.1.1 $\sin 43^\circ + \cos 47^\circ$ (1)

1.1.2 $\tan^2 50^\circ$ (1)

1.1.3 $\cot 33^\circ + \operatorname{cosec} 15^\circ$ (1)

1.2 If $A = 34,3^\circ$ and $B = 22,2^\circ$, calculate the following to two decimal places:

1.3.2 $\tan 45^\circ + \cos 45^\circ$ (1)

1.3.3 $\cos 90^\circ + \sin 90^\circ$ (1)

[12]

QUESTION 2

Without the use of a calculator, answer the following questions:

2.1 Given $\cos \theta = -\frac{1}{5}$ and $0^\circ \leq \theta \leq 180^\circ$
Use a diagram to determine the values of:

2.1.1 $\tan(180^\circ + \theta)$ (1)

2.1.2 $3\sin(\theta - 90^\circ)$ (2)

2.2 Simplify the following expression: $\frac{\sin(-230^\circ)}{\cos(240^\circ)} + \frac{\cos(190^\circ)}{\sin(260^\circ + \pi)}$ (5)

2.3 Proof that: $\tan \theta \sqrt{\frac{1}{\sin^2 \theta} - 1} = 1$ (4)

2.4 Determine the general solution for: $3\sin^2 \theta + 1 = \sin \theta$ (6)

[28]

QUESTION 3

3.1 Sketch on the same set of axes the graphs for:

$f(x) = -2\cos x$ and $g(x) = \sin 2x$, for the interval $-90^\circ \leq x \leq 180^\circ$.

Show the coordinates of the turning points and all axis intercepts. (5)

3.2 Study the following sketch and determine the value of $\cos \theta - \cos \phi$, without the use of a calculator.

(5)
[10]

QUESTION 4

In the diagram below, the angle between line AB and the x-axis is β . The angle between line CD and the x-axis is θ . A and D are the x-axis intercept points for lines AB and CD respectively. The coordinates of point B are $(\sqrt{3}, 2)$.

The intercept point E, of lines AB and CD lies on the y-axis. $\angle EDC = 63,69^\circ$

The equation of the line CD is given as: $3x + 2y = 6$

4.1 Determine the coordinates of E. (2)

4.2 Calculate the numerical value of α . (2)

Mathematics Paper Licks 2013:

Current Technical Papers, 1972 The Computing Universe Anthony J. G. Hey, Gyuri Pápay, 2015 This exciting and accessible book takes us on a journey from the early days of computers to the cutting edge research of the present day that will shape computing in the coming decades It introduces a fascinating cast of dreamers and inventors who brought these great technological developments into every corner of the modern world and will open up the universe of computing to anyone who has ever wondered where his or her smartphone came from **Domination in Graphs: Core Concepts** Teresa W. Haynes, Stephen T. Hedetniemi, Michael A. Henning, 2023-04-29 This monograph is designed to be an in depth introduction to domination in graphs It focuses on three core concepts domination total domination and independent domination It contains major results on these foundational domination numbers including a wide variety of in depth proofs of selected results providing the reader with a toolbox of proof techniques used in domination theory Additionally the book is intended as an invaluable reference resource for a variety of readerships namely established researchers in the field of domination who want an updated comprehensive coverage of domination theory next researchers in graph theory who wish to become acquainted with newer topics in domination along with major developments in the field and some of the proof techniques used and graduate students with interests in graph theory who might find the theory and many real world applications of domination of interest for masters and doctoral thesis topics The focused coverage also provides a good basis for seminars in domination theory or domination algorithms and complexity The authors set out to provide the community with an updated and comprehensive treatment on the major topics in domination in graphs And by Jove they ve done it In recent years the authors have curated and published two contributed volumes Topics in Domination in Graphs 2020 and Structures of Domination in Graphs 2021 This book rounds out the coverage entirely The reader is assumed to be acquainted with the basic concepts of graph theory and has had some exposure to graph theory at an introductory level As graph theory terminology sometimes varies a glossary of terms and notation is provided at the end of the book Combinatorics, Graph Theory and Computing Frederick Hoffman, Sarah Holliday, Zvi Rosen, Farhad Shahrokhi, John Wierman, 2024-06-15 This proceedings volume convenes selected revised papers presented at the 52nd Southeastern International Conference on Combinatorics Graph Theory and Computing SEICCGTC 2021 virtually held at Florida Atlantic University in Boca Raton USA on March 8 12 2021 As has been a tradition since its inception in 1970 this edition once more brought together mathematicians practitioners and scientists around novel findings in combinatorics graph theory and computing and their interactions The lectures and works presented at the Conference have proven to be of great interest to other scientists and analysts employing these mathematical sciences in their professional activities in business industry and government Such an environment promotes a better understanding of the roles of modern applied mathematics combinatorics and computer science Many works have demonstrated that disciplines have increasingly contributed to each other With this series of

Conferences the gaps between the fields tend to decrease even further This volume is of particular interest for the community of pure and applied mathematicians in academia industry and government working in combinatorics and graph theory as well as related areas of computer science and the interactions among these fields Its findings can also benefit a general audience of practitioners and students from related fields **A New Psychology of Women** Hilary M.

Colbourn,Roberto Grossi,Nadia Pisanti,2019-07-15 This book

constitutes the refereed post conference proceedings of the 30th International Workshop on Combinatorial Algorithms IWOCA 2019 held in Pisa Italy in July 2019 The 36 regular papers presented in this volume were carefully reviewed and selected from 73 submissions They cover diverse areas of combinatorial algorithms complexity theory graph theory and combinatorics combinatorial optimization cryptography and information security algorithms on strings and graphs graph drawing and labelling computational algebra and geometry computational biology probabilistic and randomized algorithms algorithms for big data analytics and new paradigms of computation *How Students Think When Doing Algebra* Steve Rhine,Rachel Harrington,Colin Starr,2018-11-01 Algebra is the gateway to college and careers yet it functions as the eye of the needle because of low pass rates for the middle school high school course and students struggles to understand We have forty years of research that discusses the ways students think and their cognitive challenges as they engage with algebra This book is a response to the National Council of Teachers of Mathematics NCTM call to better link research and practice by

capturing what we have learned about students algebraic thinking in a way that is usable by teachers as they prepare lessons or reflect on their experiences in the classroom Through a Fund for the Improvement of Post Secondary Education FIPSE grant 17 teachers and mathematics educators read through the past 40 years of research on students algebraic thinking to capture what might be useful information for teachers to know over 1000 articles altogether The resulting five domains addressed in the book Variables Peterson Leatham 2009 The purpose of this book is to accelerate early career teachers experience with how students think when doing algebra in middle or high school as well as to supplement veteran teachers knowledge of content and students The research that this book is based upon can provide teachers with insight into the nature of a student s struggles with particular algebraic ideas to help teachers identify patterns that imply underlying thinking Our book How Students Think When Doing Algebra is not intended to be a how to book for teachers Instead it is intended to orient new teachers to the ways students think and be a book that teachers at all points in their career continually pull of the shelf when they wonder how might my students struggle with this algebraic concept I am about to teach The primary audience for this book is early career mathematics teachers who don t have extensive experience working with students engaged in mathematics However the book can also be useful to veteran teachers to supplement their knowledge and is an ideal resource for mathematics educators who are preparing preservice teachers

Linguistic and Philosophical Perspectives about Reference Ana Clara Polakof, 2025-11-13 Bringing varied perspectives on problems related to reference from philosophers of language and linguists this edited collection initiates a dialogue between the two fields The contributors to this volume both philosophers and linguists answer four questions What is reference Is there reference to the abstract Is there sentential reference Is there reference to time Each chapter is followed by two responses A linguist will comment on what the philosopher said and how it can impact the research made in the related linguistic field while a philosopher will comment on what the linguist said in a similar sort of fashion Edited by Ana Clara Polakof Linguistic and Philosophical Perspectives about Reference highlights ways that linguistics and philosophy of language are currently closely connected and can mutually benefit from sustained interaction

concepts for a general audience using science fiction poetry and critiqued contemporary society in sharp and humorous satires These works provide fresh perspectives on the place of science in Victorian society This book is for anyone fascinated by the late nineteenth century revolution in electrical technologies This is also a valuable read for historians of science and for those interested in technical education and science and society in Victorian Britain Student Motivation and Quality of Life in Higher Education Marcus Henning, Christian Krägeloh, Glenis Wong-Toi, 2014-12-17 Higher education is a high stakes process involving engagement with curricula and often entails coping with the onslaught of assessments and examinations This process creates a level of intensity that impacts on the student experience in higher education It is therefore important to consider not only the motivational aspects of learning but also quality of life issues as they have profound effects on students Quality of life affects the way students interact with their formal education and has wide reaching effects on future careers and their ability to coordinate everyday events Integrating these two concepts student motivation and quality of life brings together the explicit elements that underpin learning in the higher education context creating links between the affective and social aspects of the student life This synthesis is integral to improving student retention and quality of life and has important ramifications for educationalists administrators pastoral care and academic support service personnel and students themselves Some highlights of the book include Applied Positive Psychology in Higher Education Internationalisation and Quality of Life A Taiwanese Perspective The Computer Assisted Learning for the Mind CALM Website Teaching Skills to Increase Resilience The Oxford University Peer Support Programme Addressing the Wellbeing of Students Higher Education and Student Stress Reclaiming Light Liberty and Learning Improving academic quality of life through attribution and motivation focused counselling O P [catalog] University Microfilms, 1962 Scientific American ,1886 Monthly magazine devoted to topics of general scientific interest **Books in Print** ,1991 *Geotitles* ,1988
