Shifting Gears Susan Handy, 2023-10-31 An expertly woven history and critique of the ideas shaping transportation in the United States Excruciating traffic jams Struggling transit agencies An epidemic of pedestrian fatalities It is clear that transportation is not working in the United States and that we need to rethink our approach In *Shifting Gears* Susan Handy provides an in depth history of the ideas embedded in American transportation policy and the emergence of new ways of thinking that could give us better transportation options Weaving in bits of her own personal narrative Handy gives readers a deeper and clearer understanding of our transportation system and the roots of its successes and failures Handy covers the myriad costs of car ownership the futility of expanding highways and the misplaced faith in technological innovation She offers new ideas and strategies that can improve the health of our car centric transportation system most crucially the idea that communities across the country must create an array of choices for daily travel *Shifting Gears* asserts that a diverse transportation ecosystem is essential for creating more just sustainable communities but getting there will take a dramatic shift in how we think about transportation

Maintenance of Everything Stewart Brand, 2026-01-20 The first in depth exploration of maintenance and a powerful argument for its civilizational importance from the author of *How Buildings Learn* and creator of the *Whole Earth Catalog* Maintenance is what keeps everything going It s what keeps life going Yet it s also easy to shirk or defer until the thing breaks the system falters and everything stops The apparent paradox is profound Maintenance is absolutely necessary and maintenance is optional The first in a multi volume work *Maintenance Of Everything* Part One offers a comprehensive overview of the civilizational importance of maintenance The book begins with a dramatic contest of maintenance styles under life critical conditions the Golden Globe around the world solo sailboat race of 1968 It goes on to explore the insights that can be gleaned from vehicle maintenance from the zeal of motorcycle maintainers to the maintenance philosophies that fought for dominance of the auto industry to the state of electric vehicle manufacturing today with absorbing detours into the evolution of precision in manufacturing the enduring importance of manuals sustainment in the military and the never ending battle against corrosion *Maintenance Of Everything* is a wide ranging and provocative call to expand what we mean by maintenance not just the tiresome preventative tasks but the whole grand process of keeping a thing going It invites us to understand not only the profound impact maintenance has on our daily lives but also why taking responsibility for maintaining something whether a motorcycle a monument or our very planet can be a radical act No one else but Stewart Brand is talking about the art and science of maintenance and how to do it well This will be an instant classic Kevin Kelly founding executive editor of *Wired* A deliciously good book Matt Ridley author of *The Rational Optimist*

3 Shades of Blue James Kaplan, 2025-03-04 The National Bestseller One of The Minneapolis Star Tribune s Best Books of the Year A superb book Kaplan is a master biographer a dogged researcher and shaper of narrative and this is his most ambitious book to date Los Angeles Times From the author of the definitive biography of Frank Sinatra

the story of three towering artists Miles Davis John Coltrane and Bill Evans and how they came together to create the most iconic jazz album of all time Kind of Blue In 1959 America's great indigenous art form jazz reached the height of its power and popularity James Kaplan's magnificent 3 Shades of Blue captures how that golden era came to be and its pinnacle with the recording of Kind of Blue It's a book about music and business and race and heroin and the cities that gave jazz its home and the Black geniuses behind its rise It's an astonishing meditation on creativity and the strange environments where it can flourish most It's a book about the great forebears and founders of a lost era and the disrupters who would take the music down truly new paths And it's about why the world of jazz most people know is a museum to this never replicated period But above all 3 Shades of Blue is a book about three very different men the greatness and varied fortunes of Miles Davis John Coltrane and Bill Evans The tapestry of their lives is in Kaplan's hands a national odyssey with no direction home It is also a masterpiece a book about jazz that is as big as America

Think for Yourself Vikram Mansharamani, 2020-06-16 We've outsourced too much of our thinking How do we get it back Have you ever followed your GPS device to a deserted parking lot Or unquestioningly followed the advice of an expert perhaps a doctor or financial adviser only to learn later that your own thoughts and doubts were correct And what about the stories we've all heard over the years about sick patients whether infected with Ebola or COVID 19 who were sent home or allowed to travel because busy staff/people were following a protocol to the letter rather than using common sense Why and how do these kinds of things happen As Harvard lecturer and global trend watcher Vikram Mansharamani shows in this eye-opening and perspective-shifting book our complex data-flooded world has made us ever more reliant on experts protocols and technology Too often we've stopped thinking for ourselves With stark and compelling examples drawn from business sports and everyday life Mansharamani illustrates how in a very real sense we have outsourced our thinking to a troubling degree relinquishing our autonomy Of course experts protocols and computer-based systems are essential to helping us make informed decisions What we need is a new approach for integrating these information sources more effectively harnessing the value they provide without undermining our ability to think for ourselves The author provides principles and techniques for doing just that empowering readers with a more critical and nuanced approach to making decisions Think for Yourself is an indispensable guide for those looking to restore self-reliant thinking in a data-driven and technology-dependent yet overwhelmingly uncertain world

Value Dominant Logic Gautam Mahajan, 2018-12-07 Increasing disruption diminishing returns and demanding customers require business leaders to create more value remain relevant and stay ahead of competition CEOs must evolve a value creation culture for the company in order to properly balance the interests of customers employees investors and the marketplace People who succeed/succeed because they create value but they do so unconsciously Creating value consciously makes you create more value and destroy less value Doing something good or improving the well-being of someone creates value You buy and re-buy a product on a value basis Value dominant logic is relevant to all of us Value creation is used in all fields but is not well

understood This book takes value creation to the next level showing how value is basic to human endeavor and is not focused on enough even when we try to create value Most books on value creation focus on creating monetary value for companies This book suggests that value is greatly created and enhanced by creating value for others To create value for customers one must first create value for the providers including employees suppliers and the society at large The goal is to improve the quality of life and well being This book provides ways of implementing these thoughts and educates readers about value and how to create it *Adweek* ,2010 *Brandweek* ,2010-04 **U.S. News & World Report** ,2007 *Region Focus* ,2010
