Kcse Chemistry Paper 2013:

School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy. *Kenya National Bibliography*, 2015

The Predatory Paradox Amy Koerber, Jesse C. Starkey, Karin Ardon-Dryer, R. Glenn Cummins, Lyombe Eko, Kerk F. Kee, 2023-10-24 In today's publish or perish academic setting the institutional prizing of quantity over quality has given rise to and perpetuated the dilemma of predatory publishing. Upon a close examination however the definition of predatory itself becomes slippery, evading neat boxes or lists which might seek to easily define and guard against it. This volume serves to foreground a nuanced representation of this multifaceted issue. In such a rapidly evolving landscape this book becomes a field guide to its historical, political and economic aspects, presenting thoughtful interviews, legal analysis and original research. Case studies from both European American and non European American stakeholders emphasize the worldwide nature of the challenge faced by researchers of all levels. This coauthored book is structured into both textual and supplemental materials. Key takeaways, discussion questions and complete classroom activities accompanying each chapter provide opportunities for engagement and real world applications of these concepts. Crucially relevant to early career researchers and the senior faculty, library scholars and administrators who mentor and support them, *The Predatory Paradox: Ethics, Politics and Practices in Contemporary Scholarly Publishing* offers practical recommendations for navigating the complex and often contradictory advice currently available. University instructors and teaching faculty will also find the reading essential in order to properly prepare both graduate and undergraduate students for the potential pitfalls endemic to scholarly publishing.
