Life Science Grade 11 End Of Year Exam2014:

Social Studies Education in South and South East Asian Contexts Kerry J Kennedy, 2021-07-22 The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them Beyond the Bubble Test Linda Darling-Hammond, Frank Adamson, 2014-06-16 Performance assessment is a hot topic in school systems and educators continue to analyze its costs benefits and feasibility as a replacement for high stakes testing Until now researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment Beyond the Bubble Test How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field and not a moment too soon Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy Instead teachers need to engage students in deeper learning assessing their ability to use higher order skills Skills like synthesizing information understanding evidence and critical problem solving are not achieved when we teach to multiple choice exams Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better This book provides new perspectives on current performance assessment research plus an incisive look at what's possible at the local and state levels Linda Darling Hammond with a team of leading scholars bring together lessons learned new directions and solid recommendations into a single readily accessible compendium Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States This comprehensive resource also looks beyond our U S borders to Singapore Hong Kong and other places whose reform mindedness can serve as an example to us *Youth and the Law*, 2012 *The Schenley Experiment* Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public

education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace s reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools
