Life Science Paper 2013 Grade Gauteng:

Learning as Development Daniel A. Wagner, 2025-11-25 In this groundbreaking second edition of *Learning as Development* Daniel A. Wagner transforms our understanding of international development by positioning learning at its core. Through a compelling global lens, Wagner demonstrates how education shapes both individual destinies and national futures with real consequences for income, social mobility, health, and well-being. This new edition provides timely perspectives on education's role in an increasingly interconnected and challenged world. The work traces international development from pre-colonial times to today's learning equity movement, explores how people learn across different cultures and contexts, examines the intersection of education with critical global challenges including climate change, migration, civil conflict, and new technologies, and presents cutting-edge research through vivid, context-rich examples. Essential reading for students, practitioners, and policymakers in education, human development, sociology, anthropology, and global development, Wagner's analysis offers fresh insights into human potential for those who care about improving the lives of people across the globe.

Early mathematics counts Yasmin A. Sitabkhan, Linda Platas, 2018-07-23 This occasional paper examines common instructional strategies in early grade mathematics interventions through a review of studies in classrooms in low and middle income countries. Twenty-four studies met the criteria for inclusion, and analyses reveal four sets of instructional strategies for which there is evidence from multiple contexts. Of the 24 studies, 16 involved the use of multiple representations, 10 involved the use of developmental progressions, 6 included supporting student use of explanation and justification, and 5 included integration of informal mathematics. Based on the review, we provide conclusions and recommendations for future research and policy.

Responsible Reproductive Choice in the 21st Century Malcolm de Roubaix, 2023-01-05 This book systematically traces the development, significance, and implications of female reproductive choice. Paramount is the right to safe termination of pregnancy (TOP). In the USA, these rights are under threat after the reversal of *Roe v. Wade* (1973), confirming the eternally contested nature of the pro-life/pro-choice standoff. The approach is unique and, from all angles (historical, social, emotional, and legal), South African experience is evaluated against a global backdrop. Arguing from an ethics of responsibility, the book presents a justified, balanced, rational, and moderate position on the moral acceptability of TOP. It proposes that the morality of TOP be evaluated by balancing inherent foetal moral significance against contingent potentiality, context, and circumstance that may determine foetal development. TOP is a choice a woman faces with each pregnancy. It always has moral implications exclusive to the life of the woman. So too do continued pregnancy and parenthood, but these are of greater magnitude and duration.
