Genetically Modified Organisms Giovanni Molteni Tagliabue, 2023-04-20 Due to an intricate web of psychological socio political and economic factors an alliance of ill advised forces of radical activism and powerful commercial interests encourage the rejection of so called genetically modified organisms GMOs that is agri food products whose DNA has been directly retouched or recombined rDNA While the pseudo concept has no scientific meaning the opponents of the agro industry insist on attacking it as an alleged symbol of the exploitation of nature for greed and profit this socio political struggle in itself legitimate but directed at the wrong target fosters doubts and fears about the supposed negative effects of GMOs on the environment and health Instead scientists recommend carefully checking new individual plant varieties or animal breeds regardless of how they are obtained through rDNA or other processes Similarly the important socio economic pros and cons of the cultivation and consumption of agri food novelties in richer or poorer countries as well should be assessed independently of the developers biotech methods The book explains this contemporary taboo and calls for a well regulated use of all biotechnological innovations ending the decades long quagmire which stymies public research and its philanthropic repercussions
