Life Science Practical November 2014 Memorandum Term 4:

Shared Governance for Sustainable Working Landscapes Timothy M. Gieseke, 2016-08-05 Sustaining our agricultural landscapes is no longer just a technical scientific or even political problem but it has evolved into a socially complex so called wicked problem of conflicting social governance and economics This creates an extreme economic obstacle where the value of ecosystem services remains low and diffuse and the transactions costs remain high and multiple Using Uber like business platform technology and a shared governance model a symbiotic demand for environmental benefits is created Enabling multi sector transactions for environmental benefits this platform innovation would remedy the tragedy of the commons the economic nemesis to achieving landscape sustainability In a nutshell to sustain our agricultural landscapes a transdisciplinary approach supported by a shared governance model housed within a multi sided platform is needed This book introduces an assessment framework identifying governance actors styles and ratios for socio ecological systems The assessment uses a new governance compass to identify the types of actors completing which tasks and identifies the styles of governance used to complete the tasks It is aimed to anyone involved in sustainability science agricultural policy planning or integrated landscape design

Knowledge, Policy, and Expertise Susan Owens, 2015-08-06 This book presents a fascinating analysis of expertise and policy formation based on an in depth study of the UK Royal Commission on Environmental Pollution The Commission provided expert advice to governments from 1970 to 2011 Often portrayed as a scientific body it was in fact an interesting hybrid which embodied wide ranging expertise It delivered thirty three reports leaving a significant mark on British environmental policy and having influence within Europe and beyond Drawing upon an extensive literature and a wide range of sources *Knowledge Policy and Expertise* provides the only full account of this important advisory body covering a period in which the policy landscape was profoundly transformed It offers a rich and detailed analysis of authority autonomy and trust of the diverse roles that advisors can play and the networks within which they operate and of the circumstances of influence in which expert advice comes to be accepted gratefully used strategically absorbed in diffuse ways or ignored Above all this book demonstrates the complexity and contingency of knowledge policy relations contributing substantially to a theory of expertise and drawing out important implications for the future of good advice

The European Union in the 21st Century Nikolaos Zahariadis, 2023-08-24 *The European Union in the 21st Century* takes a fresh look at a complex and ever changing organization by examining its pursuit of two very different objectives power security and political weight and plenty economic growth and social welfare Nikolaos Zahariadis aims to help students understand these two objectives and how the tension between them affects different issue areas illuminating how each objective represents a different perspective on what the EU is and what it does The book also introduces students to the systematic thinking that political scientists employ to see the connections between policies institutions and actors By unpacking the various perspectives students will gain greater insight into how policymakers think and why EU leaders make
