Life Science 2013 November Question Paper 1

Shou Jun Wang

Life Science 2013 November Question Paper 1:

Pandora's Gamble Alison Young, 2023-04-25 Named to Kirkus Reviews Best Books of 2023 A remarkable book The New York Times This fearless deeply reported book about laboratory accidents asks the haunting question some elite scientists don't want the public to entertain Did the COVID 19 pandemic start with a lab leak in Wuhan China This is an obvious question Yet there's been an extraordinary effort by government officials in China as well as leading scientific experts in the United States and around the world to shut down any investigation or discussion of the lab leak theory In private however some of the world's elite scientists have seen a lab accident as a very real and horrifying possibility They know what the public doesn't Lab accidents happen with shocking frequency Even at the world's best run labs That's among the revelations from Alison Young the award winning investigative reporter who has spent nearly 15 years uncovering shocking safety breaches at prestigious U.S. laboratories for USA Today and other respected news outlets In Pandora's Gamble Young goes deep into the troubling history and enormous risks of leaks and accidents at scientific labs She takes readers on a riveting journey around the world to some of the worst lab mishaps in history including the largely unknown stories of the lab workers at the U.S. Army's Camp Detrick who suffered devastating infections at alarming rates during World War II And her groundbreaking reporting exposes for the first time disturbing new details about recent accidents at prestigious laboratories and the alarming gaps in government oversight that put all of us at risk Sourced through meticulous reporting and exclusive interviews with key players including Dr. Anthony Fauci former CDC Director Tom Frieden and others Young's examination reveals that the only thing rare about lab accidents is the public rarely finds out about them Because when accidents happen powerful people and institutions often work hard to keep the information secret
