## **Life Science Grade Pnovenber 2013 Memo:**

*NASA Technical Memorandum*, 1988      *Hired Daughters* Mary Montgomery, 2019-02-19 *Hired Daughters* examines a fading tradition of domestic service in which rural girls familiar to ordinary Moroccan families were placed in their homes until marriage. In this tradition of bringing up the girls are considered daughters of the house and part of their role in the family is to help with the housework. Gradually this tradition is transforming into one in which workers unfamiliar to their host families are paid a wage and may not stay long but where the Islamic ethics of charity, religious reward and gratitude still inform expectations on both sides. Mary Montgomery examines why Moroccans so often talk about their domestic workers as daughters, what this means for workers and employers and how this is changing in contemporary Morocco. Prioritizing the experiences and perspectives of these women, Montgomery charts the tension that has developed between socially embedded loyal domestic workers who operate within narratives of kinship and obligation and women who seek greater individualization, privacy and self empowerment. *Hired Daughters* offers a nuanced understanding of a world that bridges public and private morality and money, family and outsiders. In doing so, it provides an intimate consideration of contemporary Moroccan households as economic enterprises and sites of navigation between the traditional and the global.

*The Future of the Professions* Richard Susskind, Daniel Susskind, 2022-03-31 This book predicts the decline of today's professions and introduces the people and systems that will replace them. In an internet-enhanced society, according to Richard Susskind and Daniel Susskind, we will neither need nor want doctors, teachers, accountants, architects, the clergy, consultants, lawyers and many others to work as they did in the 20th century. *The Future of the Professions* explains how increasingly capable technologies, from telepresence to artificial intelligence, will place the practical expertise of the finest specialists at the fingertips of everyone, often at no or low cost and without face-to-face interaction. The authors challenge the grand bargain, the arrangement that grants various monopolies to today's professionals. They argue that our current professions are antiquated, opaque and no longer affordable and that the expertise of their best is enjoyed only by a few. In their place, they propose five new models for producing and distributing expertise in society. The book raises profound policy issues, not least about employment; they envisage a new generation of open-collared workers and about control over online expertise; they warn of new gatekeepers in an era when machines become more capable than human beings at most tasks. With a new preface exploring recent critical developments, this updated edition builds on the authors' groundbreaking research into more than a dozen professions. Illustrated with numerous examples from each, this is the first book to assess and question the relevance of the professions in the 21st century.      *Chemical Control* Michael Crowley, 2016-01-26 This thoroughly researched study highlights the international community's failure to regulate contemporary state research, development, marketing and/or deployment of riot control agents and incapacitating chemical agent weapons.      *The Hard Sell* Evan Hughes, 2022-01-18 The inside story of a band of entrepreneurial upstarts who made millions selling painkillers.

until their scheme unraveled putting them at the center of a landmark criminal trial SOON TO BE THE MAJOR MOTION PICTURE PAIN HUSTLERS STARRING EMILY BLUNT AND CHRIS EVANS Unfolds with the velocity and verve of a Scorsese film A tour de force Patrick Radden Keefe New York Times bestselling author of Empire of Pain and Say Nothing John Kapoor had already amassed a small fortune in pharmaceuticals when he founded Insys Therapeutics It was the early 2000s a boom time for painkillers and he developed a novel formulation of fentanyl the most potent opioid on the market Kapoor a brilliant immigrant scientist with relentless business instincts was eager to make the most of his innovation He gathered around him an ambitious group of young lieutenants His head of sales an unstable and unmanageable leader but a genius of persuasion built a team willing to pull every lever to close a sale going so far as to recruit an exotic dancer ready to scrape her way up They zeroed in on the eccentric and suspect doctors receptive to their methods Employees at headquarters did their part by deceiving insurance companies The drug was a niche product approved only for cancer patients in dire condition but the company's leadership pushed it more widely and together they turned Insys into a Wall Street sensation But several insiders reached their breaking point and blew the whistle They sparked a sprawling investigation that would lead to a dramatic courtroom battle breaking new ground in the government's fight to hold the drug industry accountable in the spread of addictive opioids In The Hard Sell National Magazine Award finalist Evan Hughes lays bare the pharma playbook He draws on unprecedented access to insiders of the Insys saga from top executives to foot soldiers from the patients and staff of far flung clinics to the Boston investigators who treated the case as a drug trafficking conspiracy flipping cooperators and closing in on the key players With colorful characters and true suspense The Hard Sell offers a bracing look not just at Insys but at how opioids are sold at the point they first enter the national bloodstream in the doctor's office *Discover Sociology* William J.
