Mathematics Paper Feb And March 2014:

The Rise of the Cyberzines: The Story of the Science-Fiction Magazines from 1991 to 2020 Mike Ashley, 2022-02-15
Shortlisted for the Locus Science Fiction Foundation Non Fiction Award 2023 *The Rise of the Cyberzines* concludes Mike Ashley's five volume series which has tracked the evolution of the science fiction magazine from its earliest days in the 1920s to its current explosion via the internet. This series has traced the ways in which the science fiction magazine has reacted to the times and often led the way in breaking down barriers for example in encouraging a greater contribution by women writers and stimulating science fiction globally. Magazines have continued to build upon past revolutions such as the new wave and cyberpunk producing a blend of high tech science fiction and expansive speculative fiction that has broadened the understanding of science and its impact on society. This final volume which covers the years 1991-2020 shows how the online magazine has superseded the print magazine and has continued to break down barriers especially for the LGBTQ community and for writers of colour.

Inspiring Primary Learners Roger McDonald, Poppy Gibson, 2021-02-25 *Inspiring Primary Learners* offers trainee and qualified teachers high quality case studies of outstanding practice in contemporary classrooms across the country. Expert authors unravel and reveal the theory and evidence that underpins lessons helping you make connections with your own practice and understand what excellent looks like within each context and how it is achieved. Illustrated throughout with interviews, photos and examples of children's work, it covers a range of primary subjects and key topics including creating displays, outdoor learning and developing a reading for pleasure culture. The voice of the practitioner is evident throughout as teachers share their own experience, difficulties and solutions to ensure that children are inspired by their learning. Written in two parts, the first exemplifies examples of practice for each National Curriculum subject whilst the second focuses on the wider curriculum and explores issues pertinent to the primary classroom, highlighting important discussions on topics such as Reading for pleasure, Writing for pleasure, Creating a dynamic and responsive curriculum, Creating inspiring displays, Outdoor learning, Pedagogy for imagination, Relationships and Sex Education. This key text shows how even within the contested space of education, practitioners can inspire their primary learners through teaching with passion and purpose for the empowerment of the children in their class. For all new teachers, it provides advice and ideas for effective and engaging learning experiences across the curriculum.
