Memo Of Life Science Grade 10 November2014

Ming Li, Carlo Cattani

Memo Of Life Science Grade 10 November2014:

Global Social Policy Kepa Artaraz, Liz Cunningham, Michael Hill, 2016-06-29 Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted. As a discipline, social policy has traditionally been blunted by a focus on the nation state; however, in this age of globalisation, the most pressing challenges such as climate change, ageing populations and flagging economies serve as proof that even at national level, social policy is now more heavily influenced by global factors than ever before. In this important and authoritative text, Kepa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today. Part One discusses the different approaches to social policy and explores the process of globalisation, looking particularly at its winners and losers and the implications it has for human well-being. Part Two examines more closely the key actors in global social policy, such as the market, the state and international organisations, and Part Three provides an opportunity to explore some specific key issues of global importance, such as employment and migration, demographic change and global poverty. Adding considerable momentum to the movement away from a reductionist, nationally focused study of the discipline, *Global Social Policy* opens up new and stimulating discussions and provides a fresh framework for the study of human well-being. Using policy examples from areas around the world to provide a truly international scope, it is an essential read for students studying at all levels.

Chemical Control Michael Crowley, 2016-01-26 This thoroughly researched study highlights the international community's failure to regulate contemporary state research, development, marketing and/or deployment of riot control agents and incapacitating chemical agent weapons.

Breaking Point Rebecca Schwartz Greene, 2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II. *Breaking Point* is the first in-depth history of American psychiatry in World War II. Drawn from unpublished primary documents, oral histories and the author's personal interviews and correspondence over years with key psychiatric and military policymakers, it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination, followed by Army and Navy pre and post induction examinations. Ultimately, 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds. Never before or since has the United States engaged in such a program. In designing Selective Service Medical Circular No. 1, psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter. While many American and European psychiatrists questioned this belief, and huge numbers of American psychiatric casualties soon raised questions about screening's validity, psychiatric and military leaders persisted. In 1942 and 1943, in endorsing ever tougher screening, and little else, soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs, and Blacks and Native Americans among others complained of bias. A frustrated General

George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected
