Memorandum Of Building Science N2 July 2014:

The Science of Effective Mentorship in STEM National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Effective Mentoring in STEM, 2020-01-24

Mentorship is a catalyst capable of unleashing one's potential for discovery, curiosity, and participation in STEM and subsequently improving the training environment in which that STEM potential is fostered. Mentoring relationships provide developmental spaces in which students' STEM skills are honed and pathways into STEM fields can be discovered. Because mentorship can be so influential in shaping the future STEM workforce, its occurrence should not be left to chance or idiosyncratic implementation. There is a gap between what we know about effective mentoring and how it is practiced in higher education. The Science of Effective Mentorship in STEM studies mentoring programs and practices at the undergraduate and graduate levels. It explores the importance of mentorship, the science of mentoring relationships, mentorship of underrepresented students in STEM, mentorship structures and behaviors, and institutional cultures that support mentorship. This report and its complementary interactive guide present insights on effective programs and practices that can be adopted and adapted by institutions, departments, and individual faculty members. **The Hindu Kush**

Himalaya Assessment Philippus Wester, Arabinda Mishra, Aditi Mukherji, Arun Bhakta Shrestha, 2019-01-04. This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya (HKH) region. It comprises important scientific research on the social, economic, and environmental pillars of sustainable mountain development and will serve as a basis for evidence-based decision making to safeguard the environment and advance people's well-being. The compiled content is based on the collective knowledge of over 300 leading researchers, experts, and policymakers brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated Mountain Development (ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports under the guidance of the HIMAP Steering Committee. Eklavya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatri (Nepal), Linxiu Zhang (China), Surendra Pratap Singh (India), Tandong Yao (China), and David Molden (ICIMOD and Chair of the HIMAP SC). This First HKH Assessment Report consists of 16 chapters which comprehensively assess the current state of knowledge of the HKH region, increase the understanding of various drivers of change and their impacts, address critical data gaps, and develop a set of evidence-based and actionable policy solutions and recommendations. These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals. This book is a must-read for policy makers, academics, and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports. Exporting Virtue? Pitman B. Potter, 2021-02-01. China's rise to prosperity on the international stage has been accompanied by increased tensions with international standards of law and governance. Exporting Virtue examines

human rights as an example of China's international assertiveness and considers the implications of internationalizing PRC human rights policy and practice Pitman B Potter suggests that in the absence of clear and enforceable global human rights standards China has been free to pursue its political interests and policy initiatives Couched in terms of virtue but manifested as authoritarianism China's international human rights activism invites scholars and policy makers around the world to engage critically with the issue Drawing on both Chinese and English language sources *Exporting Virtue* investigates the challenges that China's human rights orthodoxy poses to international norms and institutions offering normative and institutional analysis and providing suggestions for policy response

Mobile Educational Spaces and Imaginative Student Experiences Jingran Yu, 2025-09-15 Bringing together interdisciplinary perspectives from sociology education and human geography to investigate the space community and culture at an International Branch Campus this fascinating book provides empirical evidence to understand the implications for students future socio spatial mobilities Drawing on ethnographic data from a British International Branch Campus in China this book offers a timely discussion about transnational higher education It illustrates the mobility of the educational space where mobilities and materiality converge and are mediated by transnational imaginations Students are portrayed as imaginative travellers who may not have been physically abroad but are imaginatively mobilised by transnational material social and cultural flows on campus This book demonstrates how imaginative mobility cultivates students cosmopolitan orientations and competence while acknowledging how structural constraints weave unevenness into the imaginative flows that arise and respond to the socio spatial inequalities in global education landscapes This study also offers empirical insights into China's approach to transnational education that informs both research and policy This book is valuable reading for scholars students researchers and practitioners in higher education particularly for those with an interest in educational studies sociology and human geography
