Memorandum Of Engineering Science November 2014 For N4:

Biometrics in Support of Military Operations William C. Buhrow, 2016-11-25 Biometrics in Support of Military Operations Lessons from the Battlefield examines and evaluates recent U S military experiences in Iraq and Afghanistan in the context of the use of biometrics and related technologies The book takes a comprehensive look at how biometrics has been used to support various military operations and suggests ways that its uses can be further developed It fills a void in understanding how to incorporate biometrics by providing a guide to develop and establish formal operational roles and procedures when applying the technology Written in an informal style that makes it accessible to people who are not necessarily operators or technicians of biometrics technologies this book bridges an existing gap to better educate leaders inside and outside of the U S military on the far reaching potential of biometrics in support of tactical operations It argues that the gap between those inside and outside the military is the result of failure to document lessons learned from battle experience as well as a lack of a combined vision among the Joint Forces to fully recognize and exploit the capabilities of biometrics for enhanced future success This book fills that gap Biometrics has great potential as an effective tool if properly developed and utilized The book concludes with a look at the future of emerging applications for the military but also considers a wider range of deployment of biometrics outside the military such as in governmental organizations including foreign diplomacy Biometrics can be applied to any operational area that requires accurate and rapid identification of unknown individuals in order to support its operations and protect personnel and resources Biometrics in Support of Military Operations is an important beginning point in an emerging field for gaining understanding and better mastery of biometrics

The History of the Study of Landforms or the Development of Geomorphology, Volume 5 T.P. Burt, A.S. Goudie, H.A. Viles, 2022-10-20 Co published with British Society for Geomorphology This volume is the fifth in the definitive series The History of the Study of Landforms or the Development of Geomorphology Volume 1 1964 dealt with contributions to the field up to 1890 Volume 2 1973 with the concepts and contributions of William Morris Davis and Volume 3 1991 covered historical and regional themes during the classic period of geomorphology 1890 1950 Volume 4 2008 concentrated on studies of geomorphological processes and Quaternary geomorphology between 1890 and 1965 by the end of this period process based studies had become dominant Volume 5 builds on this platform covering in detail the revolutionary changes in approach that

characterized the study of geomorphology in the second half of the twentieth century It is divided into three sections the first deals with changes in approach and method the second with changes in ideas and the broader scientific context within which geomorphology is studied and the final section details advances in research on processes and landforms The volume s objective is to describe and analyse many of the developments that provide a foundation for the rich and varied subject matter of twenty first century geomorphology

China as a Twenty-First Century Naval Power Michael A McDevitt, 2020-10-15 Xi Jinping has made his ambitions for the People s Liberation Army PLA perfectly clear there is no mystery what he wants first that China should become a great maritime power and secondly that the PLA become a world class armed force by 2050 He wants this latter objective to be largely completed by 2035 China as a Twenty First Century Naval Power focuses on China s navy and how it is being transformed to satisfy the world class goal Beginning with an exploration of why China is seeking to become such a major maritime power author Michael McDevitt first explores the strategic rationale behind Xi s two objectives China s reliance on foreign trade and overseas interests such as China s Belt and Road strategy In turn this has created concerns within the senior levels of China s military about the vulnerability of its overseas interests and maritime life lines is a major theme McDevitt dubs this China s sea lane anxiety and traces how this has required the PLA Navy to evolve from a near seas focused navy to one that has global reach a blue water navy He details how quickly this transformation has taken place thanks to a patient step by step approach and abundant funding The more than 10 years of anti piracy patrols in the far reaches of the Indian Ocean has acted as a learning curve accelerator to blue water status McDevitt then explores the PLA Navy s role in the South China Sea and the Indian Ocean He provides a detailed assessment of what the PLAN will be expected to do if Beijing chooses to attack Taiwan potentially triggering combat with America s first responders in East Asia especially the U S Seventh Fleet and U S Fifth Air Force He conducts a close exploration of how the PLA Navy fits into China s campaign plan aimed at keeping reinforcing U S forces at arm s length what the Pentagon calls anti access and area denial A2 AD if war has broken out over Taiwan or because of attacks on U S allies and friends that live in the shadow of China McDevitt does not know how Xi defines world class but the evidence from the past 15 years of building a blue water force has already made the PLA Navy the second largest globally capable navy in the world This book concludes with a forecast of what Xi s vision of a world class navy might look like in the next fifteen years when the 2035 deadline is reached

Mental Models Kirsten M. A. Revell, Neville A. Stanton, 2017-04-07 There is a resurgence of interest in mental models due to advances in our understanding of how they can be used to help design and due to the development of practical methods to elicit them This book brings both areas together with a focus on reducing domestic energy consumption The book focuses on how mental models can be applied in design to bring out behaviour change resulting in increased achievement of home heating goals reduced waste and improved comfort This book also offers a method to extract and apply mental models to interface design The approach enables mental models to be applied across

domains when behaviour change was sought and is validated as a useful design method *International Best Practices of Public-Private Partnership* Robert Osei-Kyei, Albert P. C. Chan, 2021-02-09 This book discusses how Public Private Partnership PPP is practiced in developed and developing economies The book demonstrates how PPP as a concept has grown over the years with many governments particularly from developing economies countries seeking to enhance infrastructure growth and development through this scheme Further the book explores how PPP has become the major infrastructure procurement policy adopted by many governments globally to address the rapid increase in demand for infrastructure due to the increase in population growth Although there are many available textbooks on PPP this book is unique because it provides in depth analysis and discussion on the international best practices of PPP from developed and developing economies perspectives This book provides strategic measures useful practices and information about the similarities and differences in PPP practices in developed and developing economies based on empirical evidence and case studies This book is structured in nine chapters The first chapter explores the basic concept of PPPs The second chapter looks at the global development and practices of PPP particularly from developed and developing economies perspectives The third to the eight chapters explores critical topics and issues in international PPP practices from developed and developing economies perspectives The topics included in this book are governments motivations for adopting PPPs barriers to PPP implementation measuring PPP project success risk management in PPPs causes of conflict and conflict resolution mechanisms in PPPs and management of unsolicited proposals The ninth chapter presents a comprehensive best practice framework for implementing international PPP projects This book is useful to undergraduate and postgraduate students in architecture civil engineering business construction and project management researchers interested in PPP topics international investors and financiers public authorities and departments and international development banks This book provides in depth insights and understanding on the best practices for PPP from the international perspective especially from the viewpoint of countries with diverse culture and policies Importantly readers will be adequately informed of the similarities and differences of PPP practices and processes in developed and developing economies based on empirical evidence Investors and governments will be informed of the strategic plans and preventive actions to employ when engaging in PPP arrangements in any part of the world

Tectonic Evolution, Collision, and Seismicity of Southwest Asia Rasoul Sorkhabi, 2017-12-21 Southwest Asia is one of the most remarkable regions on Earth in terms of active faulting and folding large magnitude earthquakes volcanic landscapes petroliferous foreland basins historical civilizations as well as geologic outcrops that display the protracted and complex 540 m y stratigraphic record of Earth s Phanerozoic Era Emerged from the birth and demise of the Paleo Tethys and Neo Tethys oceans southwest Asia is currently the locus of ongoing tectonic collision between the Eurasia Arabia continental plates The region is characterized by the high plateaus of Iran and Anatolia fringed by the lofty ranges of Zagros Alborz Caucasus Taurus and Pontic mountains the region also includes the strategic marine domains of the Persian Gulf Gulf of

Oman Caspian and Mediterranean This 19 chapter volume published in honor of Manuel Berberian a preeminent geologist from the region brings together a wealth of new data analyses and frontier research on the geologic evolution collisional tectonics active deformation and historical and modern seismicity of key areas in southwest Asia Inverse Heat Conduction Keith A. Woodbury, Hamidreza Najafi, Filippo de Monte, James V. Beck, 2023-03-14 Inverse Heat Conduction A comprehensive reference on the field of inverse heat conduction problems IHCPs now including advanced topics numerous practical examples and downloadable MATLAB codes The First Edition of the classic book Inverse Heat Conduction III Posed Problems published in 1985 has been used as one of the primary references for researchers and professionals working on IHCPs due to its comprehensive scope and dedication to the topic The Second Edition of the book is a largely revised version of the First Edition with several all new chapters and significant enhancement of the previous material Over the past 30 years the authors of this Second Edition have collaborated on research projects that form the basis for this book which can serve as an effective textbook for graduate students and as a reliable reference book for professionals Examples and problems throughout the text reinforce concepts presented The Second Edition continues emphasis from the First Edition on linear heat conduction problems with revised presentation of Stolz Function Specification and Tikhonov Regularization methods and expands coverage to include Conjugate Gradient Methods and the Singular Value Decomposition method The Filter Matrix concept is explained and embraced throughout the presentation and allows any of these solution techniques to be represented in a simple explicit linear form Two direct approaches suitable for non linear problems the Adjoint Method and Kalman Filtering are presented as well as an adaptation of the Filter Matrix approach applicable to non linear heat conduction problems In the Second Edition of Inverse Heat Conduction III Posed Problems readers will find A comprehensive literature review of IHCP applications in various fields of engineering Exact solutions to several fundamental problems for direct heat conduction problems the concept of the computational analytical solution and approximate solution methods for discrete time steps using superposition of exact solutions which form the basis for the IHCP solutions in the text IHCP solution methods and comparison of many of these approaches through a common suite of test problems Filter matrix form of IHCP solution methods and discussion of using filter form Tikhonov regularization for solving complex IHCPs in multi layer domain with temperature dependent material properties Methods and criteria for selection of the optimal degree of regularization in solution of IHCPs Application of the filter concept for solving two dimensional transient IHCP problems with multiple unknown heat fluxes Estimating the heat transfer coefficient h for lumped capacitance body and bodies with temperature gradients Bias in temperature measurements in the IHCP and correcting for temperature measurement bias Inverse Heat Conduction is a must have resource on the topic for mechanical aerospace chemical biomedical or metallurgical engineers who are active in the design and analysis of thermal systems within the fields of manufacturing aerospace medical defense and instrumentation as well as researchers in the areas of thermal science and computational heat transfer
