Academic Pipeline Programs Curtis D. Byrd, Rihana S. Mason, 2021-05-28 Academic pipeline programs are critical to effectively support the steady increase of diverse students entering the academy. Academic Pipeline Programs: Diversifying Bachelor's to the Professoriate describes best practices of successful academic government and privately funded pre-collegiate, collegiate, graduate, and postdoctoral faculty development pipeline programs. The authors explore 21 hallmark academic pipeline programs using their THRIVE index: Type, History, Research, Inclusion, Identity, Voice, and Expectation. The final chapter of the book offers information for using and starting similar programs. The appendix offers an interactive Geographic Information System (GIS) mapped database of programs using the THRIVE index. This book will equip parents, high school counselors, college advisors, faculty, department chairs, and higher education administrators to identify academic pipeline programs that fit their needs. Readers will also learn about how academic pipeline programs are situated within an institutional or organizational change model.

Connecting People to Their Oceans: Issues and Options for Effective Ocean Literacy Angel Borja, Francesca Santoro, Gail Scowcroft, Stephen Fletcher, Pierre Strosser, 2020-03-25 While there is growing evidence of the importance of marine ecosystems for our societies, evidence shows also that pressures from human activities on these ecosystems are increasing, putting the health of marine ecosystems at stake worldwide. Hence, Blue Economy is becoming an important component of future socio-economic development strategies. e.g., this is called Blue Growth in Europe that eventually can result in increasing pressures at sea and despite the current regulatory framework in particular with the Oceans Act in USA or Canada and the Marine Strategy Framework Directive in Europe it is likely that this situation will continue in the future. Ensuring all those connected to the sea directly or indirectly gain a better understanding of the importance of the seas, the human-sea interactions and opportunities to act better and reduce impacts from human pressures is central to Ocean Literacy (OL). Receiving increasing attention in Europe and USA, OL is a challenge for all parts of society, educators. 2. the role OL could play in interaction with innovation, regulation, economic incentive, social norms to support human capital development as key component of sustainable growth and 3. pre-conditions for effective OL for different sectors and target groups. Questions relevant to OL include: Which knowledge produced by whom to share and how? Who to target and how to effectively reach those targeted? How to design OL initiatives including by mobilizing those targeted via living lab approaches. e.g., to ensure effective OL and pave the way for behavior change. What are the knowledge gaps that limit our capacity to design effective OL? As scientists, it is likely you have many more questions to offer and discuss.
