Life Orientation Question 4 In Memo Of November 2014:

Surviving Brain Damage After Assault Barbara A. Wilson, Samira Kashinath Dhamapurkar, Anita Rose, 2016-02-02 At the age of twenty eight Gary was assaulted by a gang with baseball bats and a hammer resulting in several skull fractures and severe brain damage For nineteen months he had little awareness of his surroundings before he started to show some recovery This inspirational book documents his exceptional journey The book presents a series of interviews with Gary his mother Wendie who never gave up the medical team who initially treated him and the therapists who worked with him over a period of three years Through their testimony we learn about the devastating effects which can follow a serious assault to the head and the long process of recovery over several years With specialist rehabilitation and continuing family support Gary has exceeded expectations and apart from some minor physical problems he is now a normal young man *Surviving Brain Damage after Assault* shows that contrary to popular belief considerable gains can be made by people who have experienced a long period of reduced consciousness The book will be of great value to all professionals working in rehabilitation psychologists speech and language therapists occupational therapists social workers and rehabilitation doctors and to people who have sustained a brain injury and their families Neuropsychology and Neuropsychiatry of Neurodegenerative Disorders

Manuel Menéndez-González, Tania Álvarez Avellón, 2016-01-25 This book compiles all articles within the Research Topic Neuropsychology and neuropsychiatry of neurodegenerative disorders published in the journal *Frontiers in Aging Neuroscience* The call was launched in 2014 and closed in 2015 with 21 articles published Papers deal on several important topics of neuropsychology such as language and visuospatial functions and neuropsychiatry such as the emotional or motivational spheres and the interphase between them There are also articles on psychometry brain morphometry brain connectivity diagnostic tests and interventional studies All these articles are focused on neurodegenerative conditions mostly Alzheimer s disease and Parkinson s disease Interestingly several articles addressed the early stages of these diseases All together this Research Topic provides a rich perspective of the research made today around neuropsychological and neuropsychiatric aspects of neurodegenerative diseases We hope readers enjoy this collection of articles *The Routledge Handbook to Rethinking Ethics in International Relations* Birgit Schippers, 2020-05-21

Discussing cutting edge debates in the field of international ethics this key volume builds on existing work in the normative study of international relations It responds to a substantial appetite for scholarship that challenges established approaches and examines new perspectives on international ethics and that appraises the ethical implications of problems occupying students and scholars of international relations in the twenty first century The contributions written by a team of international scholars provide authoritative surveys and interventions into the field of international ethics Focusing on new and emerging ethical challenges to international relations and approaching existing challenges through the lens of new theoretical and methodological frameworks the book is structured around five themes New directions in international ethics Ethical actors and practices in

international relations The ethics of climate change globalization and health Technology and ethics in international relations The ethics of global security Interdisciplinary in its scope this book will be an important resource for scholars and students in the fields of politics and international relations philosophy law and sociology and a useful reference for anyone who wishes to acquire ethical competence in the area of international relations

Experimental models of early exposure to alcohol: a way to unravel the neurobiology of mental retardation Alberto Granato, Andrea De Giorgio, 2015-01-27 Excessive alcohol drinking represents a major social and public health problem for several countries Alcohol abuse during pregnancy leads to a complex syndrome referred to as fetal alcohol spectrum disorders FASD chiefly characterized by mental retardation The effects of early exposure to ethanol can be reproduced in laboratory animals and this helped to answer several key questions concerning the human pathology The interest of experimental models of FASD is twofold First they increase our knowledge about the dose and modality of alcohol consumption able to induce damaging effects on the developing brain Second experimental models of FASD can provide useful hints to elucidate the basic mechanisms leading to the intellectual disability In fact experimental exposure to alcohol can be carried out during discrete often very restricted time windows As a consequence FASD models though depending on the multifaceted interference of alcohol with several molecular pathways can provide valuable information about which specific developmental periods and brain areas are critically involved in the genesis of mental retardation Putting together data obtained through several experimental paradigms of alcohol exposure and those deriving from other genetic and non genetic models one can figure out to what extent different types of mental retardation share common pathogenetic mechanisms The present Research Topic is aimed at establishing the state of the art of the current research on experimental FASD focusing on differences and homologies with other types of intellectual disability The ultimate goal is to find out a common roadmap in view of future therapeutical approaches

Embodied Cognition over the Lifespan and in Applied Settings Annalisa Setti, Anna M. Borghi, 2018-06-11 While Embodied Cognition has now been accepted as mainstream in Cognitive Science the study of its potential contribution to understanding child development and ageing as well as its potential applications is still in its infancy This collection of articles explores the contribution of Embodied Cognition to studying the lifespan and potential applied fields The contributions are theoretical and empirical and offer an important framework for future research and its applications
