## Life Science Paper Memorandum 2June:

Global Transformations in the Life Sciences, 1945–1980 Patrick Manning, Mat Savelli, 2018-06-07 The second half of the twentieth century brought extraordinary transformations in knowledge and practice of the life sciences In an era of decolonization mass social welfare policies and the formation of new international institutions such as UNESCO and the WHO monumental advances were made in both theoretical and practical applications of the life sciences including the discovery of life's molecular processes and substantive improvements in global public health and medicine Combining perspectives from the history of science and world history this volume examines the impact of major world historical processes of the postwar period on the evolution of the life sciences Contributors consider the long term evolution of scientific practice research and innovation across a range of fields and subfields in the life sciences and in the context of Cold War anxieties and ambitions Together they examine how the formation of international organizations and global research programs allowed for transnational exchange and cooperation but in a period rife with competition and nationalist interests which influenced dramatic changes in the field as the postcolonial world order unfolded      **Pathogens for War** Donald H. Avery, 2013-04-28 Pathogens for War explores how Canada and its allies have attempted to deal with the threat of germ warfare one of the most fearful weapons of mass destruction since the Second World War In addressing this subject distinguished historian Donald Avery investigates the relationship between bioweapons poison gas and nuclear devices as well as the connection between bioattacks and natural disease pandemics Avery emphasizes the crucially important activities of Canadian biodefence scientists beginning with Nobel Laureate Frederick Banting at both the national level and through cooperative projects within the framework of an elaborate alliance system Delving into history through a rich collection of declassified documents Pathogens for War also devotes several chapters to the contemporary challenges of bioterrorism and disease pandemics from both national and international perspectives As such readers will not only learn about Canada's secret involvement with biological warfare but will also gain new insights into current debates about the peril of bioweapons one of today's greatest threats to world peace      The Politics of Knowledge Ellen Condliffe Lagemann, 1992-05 The Carnegie Corporation among this country's oldest and most important foundations has underwritten projects ranging from the writings of David Riesman to Sesame Street Lagemann's lively history focuses on how foundations quietly but effectively use power and private money to influence public policies      **Current Catalog** National Library of Medicine (U.S.), 1969 Includes subject section name section and 1968 1970 technical reports      **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1969 First multi year cumulation covers six years 1965 70      **Parliamentary Papers** Great Britain.  this cherished ideal American men were inducted into military service under a system that flourished for more than twenty  
 years before its rationalization was seriously questioned by more than a small minority of citizens Analyzing this paradox  
 George Flynn provides the first comprehensive look at an institution that managed to sustain political and public favor  
 through two wars before dying out under a barrage of protests during a third Placing the American draft within a historical  
 context he shows how social and political considerations determined the character of conscription in the United States The  
 draft developed as it did he argues not mainly because of military needs or strategy but because of political decisions  
 initiated by civilians with nonmilitary agendas Explaining why the draft remained relatively immune to political criticism  
 prior to the Vietnam conflict Flynn chronicles the draft s military and strategic successes and failures in America s mid  
 century wars He shows how major institutions and lobbies representing science education and various professions and  
 religions influenced it and how ultimately and ironically the selective character of the draft eventually made the system  
 inequitable and helped cause its downfall BOOK JACKET Title Summary field provided by Blackwell North America Inc All
