The Roots of Low Achievement Sandra Stotsky, 2019-07-02 The chief purpose of this book is to explain how public education in this country became dysfunctional as a result of the education policies and programs funded by the federal government to address low academic achievement. It highlights student effort as a central factor in academic achievement based on research noting its significance. Teachers and school administrators cannot make children ready for college or career by grade 12 if their parents do not make them ready for school learning by kindergarten or grade 1. Once both the schools and students' parents together made students ready for membership in our civic culture. They learned they were politically equal to each other with a shared civic identity regardless of academic achievement. Yet policy makers at USED and philanthropists in this country with a professed interest in the education of low achievers want low achievers to believe that their academic status is all that matters and that they haven't succeeded academically because of bigoted teachers, administrators, and communities. Parent-school partnerships need to revive their community's agreed-upon mission for public education if we are to alter the roots of low achievement in this country.

The Game Believes in You Greg Toppo, 2025-06-25 What if schools from the wealthiest suburban nursery school to the grittiest urban high school thrummed with the sounds of deep immersion? More and more people believe that can happen with the aid of video games. Greg Toppo's *The Game Believes in You* presents the story of a small group of visionaries who for the past 40 years have been pushing to get game controllers into the hands of learners. Among the game revolutionaries you'll meet in this book: a game designer at the University of Southern California leading a team to design a video game version of Thoreau's *Walden Pond*; a young neuroscientist and game designer whose research on *Math Without Words* is revolutionizing how the subject is taught, especially to students with limited English abilities; a Virginia Tech music instructor who is leading a group of high school-aged boys through the creation of an original opera staged totally in the online game *Minecraft*. Experts argue that games do truly believe in you. They focus, inspire, and reassure people in ways that many teachers can't. Games give people a chance to learn at their own pace, take risks, cultivate deeper understanding, fail, and want to try again right away, and ultimately succeed in ways that too often elude them in school. This book is sure to excite and inspire educators and parents as well as provoke some passionate debate.
