The book's 40 articles cover a wide range of topics and reflect the diverse perspectives of the eminent policy makers, practitioners and researchers who authored them. To maximize its potential impact, this Springer Asian Development Bank co-publication has been made available as open access.

Accountability in education: meeting our commitments UNESCO, 2017-10-30

The second edition of the Global Education Monitoring Report (GEM Report) presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals. With hundreds of millions of people still not going to school and many not achieving minimum skills at school, it is clear education systems are off track to achieve global goals. The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs. Faced with these challenges along with tight budgets and increased emphasis on results-oriented value for money, countries are searching for solutions. Increased accountability often tops the list. The 2017 8 GEM Report shows the entire array of approaches to accountability in education. It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive, equitable and high quality education and lifelong learning for all. The report emphasizes that education is a shared responsibility. While governments have primary responsibility, all actors—schools, teachers, parents, students, international organizations, private sector providers, civil society and the media—have a role in improving education systems. The report emphasized the importance of transparency and availability of information but urges caution in how data are used. It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions. In an era of multiple accountability tools, the report provides clear evidence on those that are working and those that are not.
