Features Of The Perception And Construction Of Melodies Peter Herborn, Most people in the Western world listen to music because of emotions They want to create or experience emotions But music is made of tones tones are sound waves and sound waves are physics How is it possible that physics becomes psychology because emotions are a psychological phenomenon When people like a certain piece of music they usually want to listen to it again and again Not infrequently for years and decades What could be the reasons for this When people like a piece of music it is primarily the melody that they like For most people the melody is the face of a piece More than anything else it is the element of music they remember What are the characteristics of melodies that make them to be remembered by listeners What features of the melody could it be that ensure being liked by listeners Based on more than 300 keywords over 160 musical examples and 39 charts answers to these and many other questions are sought and offered in this book This book is always two in one By illuminating how melodies are built that enjoy great popularity it is a book of music theory In this way it addresses readers who are primarily interested in the book because they themselves invent melodies By illuminating what psychological mechanisms and physiological responses trigger the melodic operations of composers and improvisers it is an introduction to music psychological thinking It combines fundamental considerations from cognitive science psychology anthropology and linguistics Thus it is addressed not only to music theorists and musicologists but ultimately to all readers

Zur kognitionspsychologischen Begründung einer systematischen Melodielehre Elke Winkelhaus,2004 Der häufig beklagte Mangel an Melodielehre Schriften ist angesichts ihrer Vielzahl nicht länger haltbar sondern betrifft letztlich die fehlende Kontinuität der Auseinandersetzung auf dem Gebiet der Melodie sowie das Nichtbeachten der kognitiven Prinzipien

der melodischen Wahrnehmung Für die Untersuchung der kognitionspsychologischen Bedeutung musiktheoretischer Melodiebildungsregeln ist die Unterscheidung und Beziehung zwischen den Techniken der kompositorischen Melodiebildung und den universellen sowie individuellen kognitiven Wahrnehmungsprinzipien der subjektiven Melodiebildung entscheidend. Auf dieser Grundlage lassen sich gute Melodien als gut kognitiv fassbare Melodien definieren, die sich durch bestimmte empirisch nachweisbare melodische Strukturmerkmale auszeichnen.
