Melting Away Images Of The Arctic And Antarctic:

Melting Away Camille Seaman, 2014-12-02 For ten years Camille Seaman has documented the rapidly changing landscapes of Earth's polar regions. As an expedition photographer aboard small ships in the Arctic and Antarctic she has chronicled the accelerating effects of global warming on the jagged face of nearly fifty thousand icebergs. Seaman's unique perspective of the landscape is entwined with her Native American upbringing; she sees no two icebergs as alike; each responds to its environment uniquely, almost as if they were living beings. Through Seaman's lens, each towering chunk of ice, breathtakingly beautiful in layers of smoky gray and turquoise blue, takes on a distinct personality, giving her work the feel of majestic portraiture. *Melting Away* collects seventy-five of Seaman's most captivating photographs, life-affirming images that reveal not only what we have already lost but more importantly, what we still have that is worth fighting to save.

Environmental Communication and the Public Sphere Phaedra C. Pezzullo, Robert Cox, 2017-10-24 This is the best undergraduate text devoted to environmental communication. It's the standard book for an introduction to the field. Jeffrey L. Courtright, Illinois State University. The Fifth Edition of the award-winning *Environmental Communication and the Public Sphere* remains the most comprehensive introductory text in the growing field of environmental communication. This groundbreaking book focuses on the role that human communication plays in influencing the ways we perceive the environment. It also examines how we define what constitutes an environmental problem and how we decide what actions to take concerning the natural world. In the highly anticipated Fifth Edition, internationally recognized researcher Phaedra Pezzullo and three-time Sierra Club President Robert Cox leverage their vast experience to offer insights into the news media, Congress, environmental conflict, advocacy campaigns, and other real-world applications of environmental communication. This edition also explores recent events: the Trump Administration, wolf conservation, public land milestones, the Flint water crisis, corporate disinformation campaigns, new alliances for a just transition in a growing renewable energy economy, the People's Climate March, international legal precedents, and more to illustrate key terms and the significance of environmental communication.

Environmental Communication and the Public Sphere Robert Cox, Phaedra C. Pezzullo, 2015-04-17 The Fourth Edition of *Environmental Communication and the Public Sphere* remains the only comprehensive introduction to the growing field of environmental communication, ranging from an historical overview of key terms to important legal and technological developments. This innovative book focuses on how human communication influences the way we perceive and act in the environment. It also examines how we interpret environmental problems and decide what actions to take with regard to the natural world. Three-time president of the Sierra Club, the largest environmental group in the United States, lead author Robert Cox leverages his vast experience to offer insights into the news media, Congress, environmental conflict, advocacy campaigns, and other real-world applications of environmental communication. New coauthor Phaedra Pezzullo brings two decades of applied experience working with grassroots environmental justice and health organizations, citizen

advisory boards and student led campaigns as well as her internationally recognized research on toxic pollution social injustices public advocacy and more The authors introduce the reader to the major areas terms and debates of this evolving field The Fourth Edition incorporates major revisions that include four new chapters on visual and popular culture digital media and activism the sustainability of college and corporation campuses and the legal standing of citizens and nature Updates throughout the text draw on timely topics including visual communication used in climate science campaigns fracking and challenges to the right to know plastic bag bans consumer apps digital activism for environmental justice green marketing and arguments on giving legal rights to nonhuman entities from dolphins to rivers

The Atlas of Global Conservation Jonathan M. Hoekstra, 2010 The Atlas of Global Conservation is a premier resource for everyone concerned about the natural world Top scientists at The Nature Conservancy have joined forces to create this guide to the state of the planet today With over 80 full color maps and other graphics contextualized with clear informative discussion this book offers an unprecedented view of trends across the world s terrestrial marine and freshwater environments Interspersed throughout essays by noted international authorities point the way forward in confronting some of our greatest conservation challenges Publisher information

The Sun, Energy, and Climate Change Eklas Hossain, 2023-01-01 The Sun Energy and Climate Change conveys one central idea that we can utilize energy without continuing to harm the planet by increasing our reliance on energy from the sun This accessible guide stresses the sun s importance as our ultimate energy source by focusing on climate change from an energy perspective and explains the naturally balanced energy transfer from the sun to the earth and society s consumption of this energy This book is for anyone worried about environmental damage from our reliance on fossil fuels and the global fight against climate change The key message being we do not have to accept the inevitable and can work to prevent the worst

Ice humanities Klaus Dodds, Sverker Sörlin, 2022-08-02 Ice humanities is a pioneering collection of essays that tackles the existential crisis posed by the planet's diminishing ice reserves By the end of this century we will likely be facing a world where sea ice no longer reliably forms in large areas of the Arctic Ocean where glaciers have not just retreated but disappeared where ice sheets collapse and where permafrost is far from permanent The ramifications of such change are not simply geophysical and biochemical They are societal and cultural and they are about value and loss Where does this change leave our inherited ideas knowledge and experiences of ice snow frost and frozen ground How will human animal and plant communities superbly adapted to cold and high places cope with less ice or even none at all The ecological services provided by ice are breath taking providing mobility water and food security for hundreds of millions of people around the world often Indigenous and vulnerable communities The stakes could not be higher Drawing on sources ranging from oral testimony to technical scientific expertise this path breaking collection sets out a highly compelling claim for the emerging field of ice humanities convincingly demonstrating that the centrality of ice in human and non human life is now impossible to ignore *The Canadian Alpine Journal*, 1909
