## MEMORANDUM CIRCULAR NO. 81

Office of the President  
Malacañang

### MEMORANDUM CIRCULAR NO. 81

To provide government employees full opportunity to properly observe Maundy Thursday and Good Friday on 17-18 April 2025, and to allow them to travel to and from the different regions in the country, the following arrangements are hereby adopted in government offices on 18 April 2025: (a) work from home from 8:00 in the morning to 12:00 in the afternoon, subject to existing laws, rules and regulations; and (b) suspension of work in government offices, from 12:00 in the afternoon onwards.

However, agencies whose functions involve the delivery of basic and health services, preparedness/response to disasters and calamities, and/or the performance of other vital services shall continue with their operations under usual working arrangements and render the necessary services.

The adoption of work from home and suspension of work for private companies and offices is left to the discretion of their respective employers.

This Circular shall take effect immediately.

By authority of the President:

  
LOREN LEGARDA  
Executive Secretary

## **Memorandum Gradegeography Pnovember 2013:**

A World More Concrete N.D.B. Connolly, 2014-08-25 Many people characterize urban renewal projects and the power of eminent domain as two of the most widely despised and often racist tools for reshaping American cities in the postwar period. In A World More Concrete N D B Connolly uses the history of South Florida to unearth an older and far more complex story. Connolly captures nearly eighty years of political and land transactions to reveal how real estate and redevelopment created and preserved metropolitan growth and racial peace under white supremacy. Using a materialist approach, he offers a long view of capitalism and the color line, following much of the money that made land taking and Jim Crow segregation profitable and preferred approaches to governing cities throughout the twentieth century. A World More Concrete argues that black and white landlords, entrepreneurs, and even liberal community leaders used tenements and repeated land dispossession to take advantage of the poor and generate remarkable wealth. Through a political culture built on real estate, South Florida's landlords and homeowners advanced property rights and white property rights, especially at the expense of more inclusive visions of equality. For black people and many of their white allies, uses of eminent domain helped to harden class and color lines. Yet for many reformers, confiscating certain kinds of real estate through eminent domain also promised to help improve housing conditions, to undermine the neighborhood influence of powerful slumlords, and to open new opportunities for suburban life for black Floridians. Concerned more with winners and losers than with heroes and villains, A World More Concrete offers a sober assessment of money and power in Jim Crow America. It shows how negotiations between powerful real estate interests on both sides of the color line gave racial segregation a remarkable capacity to evolve, revealing property owners' power to reshape American cities in ways that can still be seen and felt today. **Cyclescapes of the Unequal City**

John G. Stehlin, 2019-10-01 A critical look at the political economy of urban bicycle infrastructure in the United States. Not long ago, bicycling in the city was considered a radical statement or a last resort, and few cyclists braved the inhospitable streets of most American cities. Today, however, the urban cyclist represents progress and the urban renaissance. City leaders now undertake ambitious new bicycle infrastructure plans and bike share schemes to promote the environmental, social, and economic health of the city and its residents. Cyclescapes of the Unequal City contextualizes and critically examines this new wave of bicycling in American cities, exploring how bicycle infrastructure planning has become a key symbol of and site of conflict over uneven urban development. John G. Stehlin traces bicycling's rise in popularity as a key policy solution for American cities facing the environmental, economic, and social contradictions of the previous century of sprawl. Using in-depth case studies from San Francisco, Philadelphia, and Detroit, he argues that the mission of bicycle advocacy has converged with and reshaped the urban growth machine around a model of livable, environmentally friendly, and innovation-based urban capitalism. While advocates envision a more sustainable city for all, the deployment of bicycle infrastructure within the framework of the neoliberal city in many ways intensifies divisions along lines of race, class, and space. Cyclescapes of the

Unequal City speaks to a growing interest in bicycling as an urban economic and environmental strategy its role in the politics of gentrification and efforts to build more diverse coalitions of bicycle advocates Grounding its analysis in both regional political economy and neighborhood based ethnography this book ultimately uses the bicycle as a lens to view major shifts in today s American city      **The Russian State and Russian Energy Companies, 1992-2018** Ingerid M.

Opdahl,2020-06-09 The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies and how this shaped Russia s foreign policy in the post Soviet region The book argues that the development of Russia s political economy mattered for foreign policy over the quarter of a century from 1992 to 2018 Energy companies roles in institutional development enabled them to influence foreign policy formation and they became available as tools to implement foreign policy The extent to which it happened for each company varied with their accessibility to the Russian state Institutional development increased state capacity in a way that strengthened Russia s political regime The book shows how the combined power of several companies in the gas oil electricity and nuclear energy industry was a key feature of Russian foreign policy both in bilateral relationships and in support of Russia s regional position In this way Russia s energy resources were converted to regional influence The book contributes to our understanding of Russia s political economy and its influence on foreign policy and of the formation of policy towards post Soviet states
