Issues examined include the evolution of the firm and the role of R & D, long-term implications of the loss of national sovereignty, international openness, social and political institutions, patterns of regional harmonization in the United States, particularly income and earnings trends across states, and the reasons for convergence, persistent regional disparities in Europe, including the roles of sectoral transformation, regional spillovers, human capital formation, and the allocation of structural funds, the experience of convergence in individual countries including Italy, the UK, Spain, and Germany. *Harvard Business School Core Collection, 1998* Baker Library, 1998
