Contemporary Insights And Transformative Perspectives In Human

Development: Review Papers, Critical Reflections And Emerging Paradigms Prof Dr Kamini Prakash Rege, 2025-07-18 The reviewed literature underscores the evolving and multifaceted nature of human development in contemporary society Young adults today face complex relational technological and societal pressures that shape their emotional psychological and social trajectories A prominent concern is the prevalence of dating abuse and psychological manipulation often involving coercion emotional degradation and isolation which can result in lasting impacts on self-esteem and mental health Relatedly the experience of being ghosted reflects broader patterns of emotional unavailability and normalization of abrupt relationship dissolution contributing to anxiety abandonment issues and mistrust Social media plays a dual role in mental health discourse While it helps destigmatize psychological disorders the commodification and misuse of diagnostic labels have led to widespread self-diagnosis and misinformation This trivialization can obscure the severity of genuine mental health conditions and reduce the perceived value of professional care Digital technologies and artificial intelligence also significantly influence the development of children and adolescents While personalized learning and educational gamification offer potential benefits they introduce concerns such as data privacy screen dependence overstimulation and reduced face-to-face socialization Human development concerns are increasingly seen as lifelong Early and pre-retirement transitions for instance highlight the need for emotional and financial preparedness beyond youth Work-life balance emerges as another critical theme for younger populations High expectations and hypercompetitive environments often result in chronic stress and burnout making balance a necessity for long-term well-being rather than a luxury Across all themes the literature emphasizes

the need for proactive interventions educational efforts and systemic reform A holistic approach to human development considering emotional cognitive relational and digital dimensions is essential Institutions educators families and policymakers must collaborate to build adaptive and resilient support systems that reflect evolving developmental needs with empathy equity and evidence based strategies
