Leibniz Contra Westphalia Conceptual Underpinnings Of Globalized Lax Sovereignty:

Leibniz Contra Westphalia William Drischler, 2015-01-06 The 21st century has been marked by the increasing irrelevance of the nation state as a locus of the political Multinational financial espionage and business organizations pay ever decreasing attention to the fractured sovereignty nation state Even the ex super power USA is a debtor nation vis a vis China Lagging behind actual developments is sovereignty theory and philosophy still bound to the hidebound Peace of Westphalia of 1648 indivisible sovereignty doctrine according to which all the participants at the 1648 Peace Conference saw the advantages of French unitary sovereignty and then adopted it themselves throughout Europe after which it was allegedly adopted worldwide In LEIBNIZ CONTRA WESTPHALIA William F Drischler argues Westphalian French indivisible sovereignty was nipped in the bud by the victors in the War of the Spanish Succession 1704 1714 after which the Blenheim victors installed their own sovereignty system Leibnizian Blenheimian lax sovereignty one which promoted the Westphalian doctrine as a distractor from their own supra national secret diplomacy activities eventually achieving global hegemony with the gambit Playing a key role in articulation of the new network installed at the Peace of Utrecht in 1713 was German philosopher and polyhistor G W Leibniz 1646 1716 whose lax sovereignty model posed in opposition to the unitary sovereignty proposals of Thomas Hobbes 1588 1679 carried the day Radically revising the widespread perception Leibniz lax sovereignty philosophy was a quaint untried alternative to universalized Westphalian sovereignty William F Drischler contends the former became the global standard by the 19th century In opposition to the notion the philosopher was a pliant spokesman for German particularist interests Drischler contends Leibniz was a dedicated revolutionary furthering the maritime bounded NOMOS sovereignty revolution of 1713 which came to rule Europe for centuries according to Carl Schmitt LEIBNIZ CONTRA WESTPHALIA is indispensable reading for understanding the post national constellation of the 21st century G.W. Leibniz. Double Revolution and Praefatio MR William F Drischler, 2015-12-22 The burgeoning literature on the political and legal philosophy of Gottfried Wilhelm Leibniz 1646 1716 is reviewed in William F Drischler s G W Leibniz Double Revolution and Praefatio sequel to his Leibniz contra Westphalia of 2015 Leading the way in recent Leibniz studies are the respective German language collections edited by Friedrich Beiderbeck Irene Dingel and Wenchao Li January 2015 and Peter Nitschke available in March 2015 both of which provide information on Leibniz Praefatio to his Codex Diplomaticus of 1693 said Praefatio serving as a Foreword to an ambitiously broad collections of treaties and other documents dating back the better part of a millenium of European legal history Drischler s revisionist double revolutionary interpretation of Leibniz political and legal agenda categorizes the Hanoverian philosopher as an Utrecht Kipjakicizer referring both to the 1713 Utrecht NOMOS global legal spatial order revolution described by Carl Schmitt in 1950 and the consolidation of the Kipjak Khanate of the Mongols of the Golden Horde in Russia 1260 1480 i e the institutional form of the Tartar Yoke in Russia described by Karl A Wittfogel in 1957 this latter the model for the integration of Russian despotic practices into Europe

during the era of Leibniz confederate Peter the Great The unprecedented character of the Eurasian structure generated in 1713 by parties such as Leibniz colleague Eugene of Savoy and Leibniz correspondent Nicolaas Witsen of Amsterdam meant the new legal actors facilitated by the ILP International Legal Personality concept of the Praefatio couldn't possibly be the German princes sometimes mentioned as the ultimate beneficiaries of ILP but rather had to be those serving the new Blenheim Utrecht network stretching from Muscovy to Amsterdam to London Leibniz most influential metaphysics statement the Monadology is to be contextualized in the 1713 year of double revolution in which it was conceived The radical implications of what Carl Schmitt termed the caesura of 1713 means conventional commentaries stressing continuity of Leibniz political and legal concerns from the 1670s to the philosopher's expiry in 1716 will have to be subjected to revision
