**Landslide Analysis and Early Warning Systems** Benni Thiebes, 2012-01-20 Recent landslide events demonstrate the need to improve landslide forecasting and early warning capabilities in order to reduce related risks and protect human lives In this thesis local and regional investigations were carried out to analyse landslide characteristics in the Swabian Alb region and to develop prototypic landslide early warning systems In the local study area an extensive hydrological and slope movement monitoring system was installed on a seasonally reactivated landslide body located in Lichtenstein Unterhausen Monitoring data was analysed to assess the influence of rainfall and snow melt on groundwater conditions and the initiation of slope movements The coupled hydrology slope stability model CHASM was applied to detect areas most prone to slope failures and to simulate slope stability using a variety of input data Subsequently CHASM was refined and two web based applications were developed a technical early warning system to constantly simulate slope stability integrating rainfall measurements hydrological monitoring data and weather forecasts and a decision support system allowing for quick calculation of stability for freely selectable slope profiles On the regional scale available landslide inventory data were analysed for their use in evaluation of rainfall thresholds proposed in other studies Adequate landslide events were selected and their triggering rainfall and snow melting conditions were compared to intensity duration and cumulative thresholds Based on the results a regional landslide early warning system was developed and implemented as a webbased application Both the local and the regional landslide early warning systems are part of a holistic and integrative early warning chain developed by the ILEWS project and could easily be transferred to other landslide prone areas

**Contributions to International Conferences on Engineering Surveying** Alojz Kopáček, Peter Kyrinovič, Ján Erdélyi, Rinaldo Paar, Ante Marendić, 2020-10-19 This book presents contributions from the joint event 8th INGEO International Conference on Engineering Surveying and 4th SIG Symposium on Engineering Geodesy which was planned to be held in Dubrovnik Croatia on April 14 2020 and was canceled due to COVID 19 pandemic situation Editors in cooperation with the Local Organisers are decided to organize the Conference on line at October 22 23 2020 We would like to invite you to participation through [http://ingeosig2020.hgd1952.hr/index.php/2020/08/31/ingeosig2020\\_virtual\\_conference\\_october\\_22\\_23\\_2020](http://ingeosig2020.hgd1952.hr/index.php/2020/08/31/ingeosig2020_virtual_conference_october_22_23_2020) The event brought together professionals in the fields of civil engineering and engineering surveying to discuss new technologies their applicability and operability

**Progress in Cultural Heritage Preservation** Marinos Ioannides, Dieter Fritsch, Johanna Leissner, Rob Davies, Fabio Remondino, Rossa Caffo, 2012-10-22 This book constitutes the refereed proceedings of the 4th International Conference on Progress in Cultural Heritage Preservation EuroMed 2012 held in Lemesos Cyprus in October November 2012 The 95 revised full papers were carefully reviewed and selected from 392 submissions The papers are organized in topical sections on digital data acquisition technologies and data processing in cultural heritage 2D and 3D data capture methodologies and data processing in cultural heritage 2D and 3D GIS in cultural heritage virtual reality in
