Aggregate Risks of Procurement to Support Decision Makers Philipp von Cube, 2019-11-05 The present thesis provides a model to monetarily aggregate procurement risks to support decision makers A material flow oriented view forms the fundament of the model The model is designed to aggregate delay quality and cost related procurement risks considering their uncertainty Procurement risks are aggregated to form a monetary risk distribution Decision makers can select procurement strategies that are adequate for their risk situation depending on their affinity for risk to mitigate procurement risks

Towards Ecological Taxation David Russell, 2016-02-24 Governments around the world are struggling to meet their commitments to achieve targets relating to reductions in greenhouse gases Many writers advocating ways to achieve these targets offer radical but often impractical approaches that do not offer a way forward within the existing economic model In contrast Towards Ecological Taxation is a pragmatic consideration of realistic possibilities by an author from the world of accounting Based on his research into the implications of changes in the UK motor taxation regime for company cars David Russell considers the broader efficacy of taxation policy as a mechanism for

reducing demand for fossil fuels and encouraging a shift towards carbon neutral energy production He incorporates the findings of a number of studies into his analysis along with a wider consideration of tax regimes Dr Russell suggests a way forward that will attract the interest of researchers policy makers and decision makers wanting a better understanding of how taxation could be used innovatively but within the existing economic status quo to deliver specific and measurable reductions in CO2 Such a distinctive approach makes this book a valuable addition to the literature on environmental issues and the always thought provoking titles in the Corporate Social Responsibility Series *Quantitative Techniques* T.
