New Critical Nostalgia Christopher Rovee, 2024-01-02 New Critical Nostalgia weighs the future of literary study by reassessing its past. It tracks today's impassioned debates about method back to the discipline's early professional era when an unprecedented makeover of American higher education with far-reaching social consequences resulted in what we might call our first crisis of academic life. Rovee probes literary study's nostalgic attachments to this past by recasting an essential episode in the historiography of English: the vigorous rejection of romanticism by American New Critics in the new light of the American university's tectonic growth. In the process, he demonstrates literary study's profound investment in romanticism and reveals the romantic lyric's special affect nostalgia as having been part of English's professional identity all along. New Critical Nostalgia meticulously shows what is lost in reducing mid-century American criticism and the intense quirky and unpredictable writings of central figures such as Cleanth Brooks, Josephine Miles, and W. K. Wimsatt to a glib monolith of New Critical anti-romanticism. In Rovee's historically rich account grounded in analysis of critical texts and enlivened by archival study, readers discover John Crowe Ransom's and William Wordsworth's shared existential nostalgia, witness the demolition of the immature Percy Shelley in the revolutionary textbook *Understanding Poetry*, explore the classroom give and take prompted by the close reading of John Keats, consider the strange ambivalence toward Lord Byron on the part of formalist critics and romantic scholars alike, and encounter the strikingly contemporary quantitative studies by one of the mid-century's preeminent poetry scholars, Josephine Miles. These complex and enthralling engagements with the romantic lyric introduce the reader to a dynamic intellectual milieu in which professionals with varying methodological commitments, from New Critics to computationalists working in radically different academic locales from Nashville and New Haven to Baton Rouge and Berkeley, wrangled over what it means to read with nothing less than the future of the discipline at stake.

The Elephant, the Tiger, and the Cell Phone Shashi Tharoor, 2007 For more than four decades after gaining independence, India, with its massive size and population, staggering poverty, and slow rate of growth, was associated with the plodding, somnolent elephant comfortably resting on its achievements of centuries gone by. Then, in the early 1990s, the elephant seemed to wake up from its slumber and slowly begin to change. Until today, in the first decade of the twenty-first century, some have begun to see it morphing into a tiger. As India turns sixty, Shashi Tharoor, novelist and essayist, reminds us of the paradox that is India: the elephant that is becoming a tiger. With the highest number of billionaires in Asia, it still has the largest number of people living amid poverty and neglect and more children who have not seen the inside of a schoolroom than any
