Rescuing Prometheus Thomas P. Hughes,2000-03-14 A rare insight into industrial planning on a huge scale Excellent The Economist Rescuing Prometheus is an eye opening and marvelously informative look at some of the technological projects that helped shape the modern world Thomas P Hughes focuses on four postwar projects whose vastness and complexity inspired new technology new organizations and new management styles The first use of computers to run systems was developed for the SAGE air defense project The Atlas missile project was so complicated it required the development of systems engineering in order to complete it The Boston Central Artery Tunnel Project tested systems engineering in the complex crucible of a large scale civilian roadway And finally the origins of the Internet fostered the collegial management style that later would take over Silicon Valley and define the modern computer industry With keen insight Hughes tells these fascinating stories while providing a riveting history of modern technology and the management systems that made it possible **Asia Pacific Shipping** ,2001 **Yachting** ,2008-01 British Communications & Electronics ,1961
