Addiction Therapy and Treatment Larry Fritzlan, LMFT,Avis Rumney, LMFT,2023-01-10 Addiction is a national mental and medical health crisis responsible for untold costs to society and severe suffering to innumerable people Yet addiction treatment as it is now practiced fails half the time The current treatment approach has changed little in the last 80 years and is a hodgepodge of often shady treatment approaches This book presents a radically different addiction treatment paradigm based on science evidence and best practices and has a success rate approaching 100% when followed closely This model should profoundly upend the current addiction treatment industry Nearly every addict lives in a social system a family workplace or community that enables and supports often unconsciously the addict s addiction Instead of the current addict focused approach this model extends treatment to the entire support system starting treatment with the concerned family members This model also proposes a single provider the family recovery therapist who manages treatment for the addict and the family from the first phone call through the first year of continuous sobriety This book offers simple recommendations to both addiction treatment providers and family members impacted by this disease It serves as a beacon of hope for families

Pain and Chemical Dependency Howard Smith,Steven Passik,2008-04-25 Both pain and addiction are tremendous public health problems Practitioners of every stripe say that they learned precious little about pain or addiction in their training and readily admit that instruction on the interface of pain and addiction is nonexistent The recent problem of prescription drug abuse has only served to highlight the fact that these two worlds need unificationthose who treat pain must

be informed about the risks of controlled substances and those who treat addiction need to better and more fully understand their benefits. Nowhere is the pooled knowledge of pain management and addiction medicine brought together to allow for a greater appreciation of the risks of addiction when treating people with pain and the pain problems of those with chemical dependency. This major new volume brings this vast knowledge base together presenting an array of perspectives by the foremost thought leaders at the interface of pain and chemical dependency and is the most comprehensive resource on the subject to date. There have been an increasing number of seminars devoted to this topic and a new society, The International Society on Pain and Chemical Dependency, has recently been formed and this volume is destined to become the classic text on this multidisciplinary subject. It will appeal to anesthesiologists, neurologists, rehab physicians, palliative care staff, pain center physicians, and psychologists.

Spirituality Matters in Social Work James Dudley, 2016-03-02. Offering a focus that is lacking or not clearly evident in most spirituality books, Dudley addresses specific ways of incorporating spirituality into practice and integrates many of the contributions of other writers into an overall eclectic practice approach. His approach revolves around many of the core competencies of the EPAS accreditation CSWE 2008. Most of the core competencies are addressed with an emphasis on professional identity, ethical practice, critical thinking, diversity, practice contexts, and a major practice framework of the book: the practice stages of engagement, assessment, intervention, and evaluation.
