Chapter assessment

1. George records the time he spends per day surfing the internet for the first three weeks of May. The times, given to the nearest minute, are as follows:

0	26	13	5	18	12	35
24	61	16	10	26	15	0
0	73	21	17	16	42	32

- Illustrate the data using a sorted stem and leaf diagram with eight stems. Comment briefly on the shape of the distribution. [3]
- Find the mode, median and mean, commenting on their relative usefulness as measures of central tendency for this data set. [5]
- Calculate the standard deviation and hence find any outliers. [4]
- George's Dad claims that he is spending too much time on the internet. He tells George to reduce his usage so that the mean daily time for May is 20% less than the current mean.
What is the maximum total time George can spend surfing the internet for the remaining 10 days of May? [3]

2. Over a period of time, a teacher recorded the number of times, x , each of the 20 students in the mathematics class was absent. The distribution was as follows.

Number of times absent, x	0	1	2	3	4	5	6	7	8	9	10	11 or more
Number of students, f	4	6	3	2	0	2	0	1	1	0	1	0

$$\sum f = 20, \quad \sum fx = 53, \quad \sum fx^2 = 299$$

- Illustrate the data using a suitable diagram. [2]
- State the mode and find the median for the data set. [2]
- Calculate the mean and the standard deviation of the data set. [3]

During this period of time, there were 30 mathematics lessons. The teacher needs to analyse the distribution of the number of times each student was *present* during the 30-lesson session.

- Without creating a new frequency distribution, deduce values for the mean and standard deviation of the numbers of times students were present. Describe the shape of the new distribution. [3]
