Memorandum Of Economic Management Sciences:

World Scientific Handbook Of Transboundary Water Management: Science, Economics, Policy And Politics (In 4 Volumes), 2025-01-10 The impacts of population growth climate change and water scarcity and variability on a country s economy or society in addition to the sheer need to harness international rivers for domestic and regional purposes have made the management of transboundary freshwater a subject of great import Over the past several decades research in various disciplines utilizing a variety of methodologies has explored these issues focusing on freshwater s strategic importance as well as conflict cooperation and negotiation over shared water bodies rivers lakes aquifers This multi volume set seeks to contribute to this still burgeoning body of literature by focusing on several key themes that can help explain and recognize successes and failures in transboundary freshwater management In particular the set seeks to bring together original scholarship focusing on international law technology institutions formal and informal and the interplay of domestic and international affairs Each edited volume in the set aims to build on extant research while also fostering new paths of inquiry Overall the set seeks to become a guide for both academics and practitioners hoping to better understand the joint management of this precious natural resource from socio political legal economic and technological perspectives Volume 1 explores international law for shared freshwater resources both surface and subsurface waters from a multidisciplinary perspective It explains the role of international water law IWL and or specific norms within particular contexts case studies and critically examines that role and its relative success or failure in achieving the intended objectives Volume 2 explores the roles of and limitations of technologies and their applications in the management of transboundary water and wastewater It presents case studies and legal and political analyses that focus on the potential or actual roles and implications of the technologies in transboundary policy and management rather than detailed explications of the technologies themselves Volume 3 contributes to the growing literature seeking to understand how when and if institutions broadly defined impact states abilities to address their joint water disputes The volume presents a combination of single comparative and empirical analyses of cases across the world about the role of institutions in facilitating collaboration over transboundary water resources and mitigating conflict Volume 4 seeks to make sense of the interplay of domestic transnational and international dynamics in explaining conflict and cooperation over water through single or comparative case studies as well as analyses of on the ground transboundary water management experiences arising from these complex political dimensions The New Palgrave Dictionary of Economics, 2016-05-18 The award winning The New Palgrave Dictionary of Economics 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product **Management Science**, 2004 Issues for Feb 1965 Aug 1967 include Bulletin of the Institute of Management Sciences **Quantitative Research in Economics and Management Sciences** Agnieszka

Zakrzewska-Bielawska, Anna M. Lis, Anna Ujwary-Gil, 2022-01-01 In this thematic issue of the Journal of Entrepreneurship Management and Innovation entitled Qualitative Research in Economics and Management Sciences the authors used many quantitative methods and research models e.g. SEM, PLS, SEM or probit models. Table 1. Each of these approaches is characterized by methodological rigor and an assessment of the reliability and validity of the research instruments used. Pini and Tchorek (2022) analyze the determinants of exports in two European culturally related countries such as Italy and Poland using an econometric and probit model which implies a normal distribution of errors and is adapted to binary responses excluding size and age variables. The authors investigate the influence of many independent variables: size, age, management by family members or external managers on the dependent variable: export. Controlling the research model by product and process innovation, location in a less developed region, operations in a high/medium/high technology intensive sector or cooperation with many banks. The results confirm the authors' initial assumptions that the size of companies influences the exports of the surveyed countries; the age of companies exporting their goods is more important in Italy than in Poland where no such impact has been recorded. In addition, management by an external manager increases the likelihood of exports for younger family businesses in Italy and smaller family businesses in Poland. The authors also showed that product innovation is the engine of exports in Italy and Poland and geographic location affects the likelihood of exports in Italy but not in Poland. In other studies, Paulino (2022) presents the growing business analytics and business intelligence in the Philippines; their impact on organizational performance and marketing financial and business process performance indicators. Retail companies were selected for the study focusing on advanced data management used in business operations. The author mainly used the well-known PLS-SEM model and his research instrument was assessed in terms of content validity, construct validity and reliability. The results of the measurement and structural model evaluation were also subject to verification. The results indicate the impact of business analytics capabilities including the ability of the decision support system (DSS), business process improvement (BPM), data dashboard (DD) and financial analysis (FA) on the business intelligence level. In addition, it has been empirically verified that organizational performance influences marketing financial and business process performance. Overall, business intelligence is an essential predictor of a retail company's organizational performance. The assumption that the level of readiness to implement business analytics can be treated as a moderating factor between business analytics and organizational performance has not been confirmed. The next article by Klimontowicz and Majewska (2022) presents the positive impact of intellectual capital (IC) especially its three components such as process capital, human capital and relational capital on the competitiveness of banks and market efficiency. The authors used the following methods and tools: Principal Axis Factor Analysis, PLS-SEM, PAPI and CAWI. As a result of their application, they emphasize that in contrast to previous research, the process capital dominates the bank's potential to create a competitive advantage, not human capital, proving the vital role of technology and innovation. They found that competitive performance moderates the relationship between IC and

market efficiency the environment positively moderates the relationship between IC and competitor performance as well as the relationship between competitor performance and market efficiency The size of the bank and the length of its market activity affect the market efficiency measured by the average rate of changes in ROA and ROE The study expands the existing evidence mainly from well developed countries on the intellectual capital of Polish banks emphasizing the process capital to a much greater extent as a modern and so far little exposed component of IC in other research The last two articles refer to human resource management Hassan s study 2022 explores the impact of human resource management HRM practices on employee retention In addition he moderates the role of performance evaluation training and development in the relationship between HRM practices and employee retention Using SEM and questionnaires validated by other researchers the author proves the originality of research in the retail sector in the Maldives on improving employee retention a complementary approach to the impact of rewards and compensations training and employee development as well as assessing their results in human capital management recommending practical solutions for the sector retail Maldives In another study on workers adaptive performance Tan and Antonio 2022 using PLS SEM prove that the new form of remote work and the so called e leadership forced by the COVID 19 pandemic have changed the way employers and employees interact Organizational commitment teleworking and a sense of purpose affect the adaptive performance of employees directly while the perception of e leadership indirectly It is also one of the first studies to capture intrinsic motivation as the antecedent of employee adaptive performance along with perceived e leadership and teleworking results *DHHS Publication No. (HRA) , Proceedings of The 16th MAC 2020* Group of Authors,2020-01-24 The 16th Multidisciplinary Academic Conference in Prague 2020 **Management Sciences, Models and Techniques** Charles West Churchman,Michel Verhulst,1960 Management Sciences Institute of Management Sciences,1960 Conference report on an international meeting to examine developments in management methodology includes papers and records of discussions and covers theoretical aspects simulation techniques in decision making computer systems evaluation techniques aspects of business organization operational research long term planning management development etc References Conference held in Paris 1959 September 7 to 11 **Agricultural marketing service, Commodity exchange authority, Economic research service, Foreign agricultural service, Agricultural stabilization and conservation service, Statistical reporting service** United States. of deterministic optimal control systems governed by ordinary differential equations It also includes an introduction to the classical calculus of variations An important feature of the book is the inclusion of a large number of examples in which the theory is applied to a wide variety of economics problems The presentation of simple models helps illuminate pertinent qualitative and analytic points useful when confronted with a more complex reality These models cover economic growth in both open and closed economies exploitation of non renewable resources pollution control behaviour of firms and differential games A great emphasis on precision pervades the book setting it apart from the bulk of literature in this area The rigorous techniques presented should help the reader avoid errors which often recur in the application of control theory within economics Economic Analysis Applied to the Practice of Dentistry ,1976 *Applied Management Science* John A.
