Robert Fried,Richard M. Carlton,2018-10-25 Approximately 29 million Americans are diagnosed with Type 2 diabetes  
annually Of that number only about 36 percent 10 44 million diabetes sufferers achieve satisfactory medical outcomes and  
would need additional help rarely available to reliably control their glucose levels Contrary to popular belief although anti  
diabetic medications can lower sugar levels nevertheless they have a poor performance track record because inflammation in  
the blood vessels persists This book details recent scientific findings that cardiovascular kidney vision peripheral nervous  
system and other body damage caused by chronic high levels of blood sugar hyperglycemia in Type 2 diabetes is actually due  
to excessive generation of unopposed free radicals and reactive oxygen species ROS These in turn cause chronic systemic  
inflammation and dysfunction of the endothelial lining of the arterial blood vessels jeopardizing the formation of the  
protective molecule nitric oxide NO thus severely impairing the blood supply to every organ and tissue in the body This book  
also catalogues the evidence that chronic hyperglycemia causes profound and often irreversible damage even long before  
Type 2 diabetes has been diagnosed In addition because conventional prescription treatments are unfortunately often  
inadequate the book details evidence based complementary means of blood sugar control      *Nutrition, Food, and the*  
*Environment* Vincent Hegarty,1995 Introduces nutrition by linking information on nutrients to an understanding of how food  
production and processing and the impact of these on environmental quality influence each person s nutritional status
