**Going Public**

Arlene Stein, Jessie Daniels, 2017-02-21 At a time when policy discussions are dominated by I feel instead of I know it is more important than ever for social scientists to make themselves heard When those who possess in depth training and expertise are excluded from public debates about pressing social issues such as climate change the prison system or healthcare vested interests can sway public opinion in uninformed ways Yet few graduate students researchers or faculty know how to do this kind of work or feel empowered to do it While there has been an increasing call for social scientists to engage more broadly with the public concrete advice for starting the conversation has been in short supply Arlene Stein and Jessie Daniels seek to change this with *Going Public* the first guide that truly explains how to be a public scholar They offer guidance on writing beyond the academy including how to get started with op eds and articles and later how to write books that appeal to general audiences They then turn to the digital realm with strategies for successfully building an online presence cultivating an audience and navigating the unique challenges of digital world They also address some of the challenges facing those who go public including the pervasive view that anything less than scholarly writing isn't serious and the stigma that one's work might be dubbed journalistic *Going Public* shows that by connecting with experts policymakers journalists and laypeople social scientists can actually make their own work stronger And by learning to effectively add their voices to the conversation researchers can help make sure that their knowledge is truly heard above the digital din

*The New Enlightenment and the Fight to Free Knowledge* Peter B. Kaufman, 2021-02-23

How do we create a universe of truthful and verifiable information available to everyone In *The New Enlightenment and the Fight to Free Knowledge* MIT Open Learning's Peter B Kaufman describes the powerful forces that have purposely crippled our efforts to share knowledge widely and freely Popes and their inquisitors emperors and their hangmen commissars and

their secret police throughout history all have sought to stanch the free flow of information Kaufman writes of times when the Bible could not be translated you d be burned for trying when dictionaries and encyclopedias were forbidden when literature and science and history books were trashed and pulped sometimes along with their authors and when efforts to develop public television and radio networks were quashed by private industry In the 21st century the enemies of free thought have taken on new and different guises giant corporate behemoths sprawling national security agencies gutted regulatory commissions Bereft of any real moral compass or sense of social responsibility their work to surveil and control us are no less nefarious than their 16th and 18th and 20th century predecessors They are all part of what Kaufman calls the Monsterverse The New Enlightenment and the Fight to Free Knowledge maps out the opportunities to mobilize for the fight ahead of us With the Internet and other means of media production and distribution video especially at hand knowledge institutions like universities libraries museums and archives have a special responsibility now to counter misinformation disinformation and fake news and especially efforts to control the free flow of information A film and video producer and former book publisher Kaufman begins to draft a new social contract for our networked video age He draws his inspiration from those who fought tooth and nail against earlier incarnations of the Monsterverse including William Tyndale in the 16th century Denis Diderot in the 18th untold numbers of Soviet and Central and East European dissidents in the 20th many of whom paid the ultimate price Their successors Advocates of free knowledge like Aaron Swartz of free software like Richard Stallman of an enlightened public television and radio network like James Killian of a freer Internet like Tim Berners Lee of fuller rights and freedoms like Edward Snowden All have been striving to secure for us a better world marked by the right balance between state society and private gain The concluding section of the book its largest piece builds on their work drawing up a progressive agenda for how today s free thinkers can band together now to fight and win With everything shut and everyone going online The New Enlightenment and the Fight to Free Knowledge is a rousing call to action that expands the definition of what it means to be a citizen in the 21st century
