*The Intellectual Property Holding Company* Jeffrey A. Maine, Xuan-Thao Nguyen, 2017-12-07 Many companies that have become household names have avoided billions in taxes by parking their valuable intellectual property assets in holding companies located in tax favored jurisdictions In the United States for example many domestic companies have moved their IP to tax favored states such as Delaware or Nevada while multinational companies have done the same by setting up foreign subsidiaries in Ireland Singapore Switzerland and the Netherlands In this illuminating work tax scholar Jeffrey A Maine teams up with IP expert Xuan Thao Nguyen to explain how the use of these IP holding companies has become economically unjustified and socially unacceptable and how numerous calls for change have been made This book should be read by anyone interested in how corporations including Gore Tex Victoria s Secret Sherwin Williams Toys R Us Apple Microsoft and Uber have avoided tax liability with IP holding companies and how different constituencies are working to stop them

**Leveraging Blockchain Technology** Shaun Aghili, 2024-11-21 Blockchain technology is a digital ledger system that allows for secure transparent and tamper proof transactions It is essentially an often decentralized distributed peer to peer database that is maintained by a network of computers instead of a single entity making it highly resistant to hacking and data breaches By providing greater security transparency and efficiency blockchain technology can help to create a more equitable and sustainable world Blockchain technology has the potential to help mankind in various ways some of which include but are not limited to Decentralization and Transparency Blockchain technology allows for decentralization of data and transactions making them more transparent and accountable This is particularly important in fields such as finance where trust and transparency are critical Increased Security Blockchain technology is inherently secure due to its distributed nature making it very difficult for hackers to compromise the system This makes it an ideal solution for data and information storage particularly in areas such as health and finance where privacy and security are of utmost importance Faster Transactions Blockchain technology eliminates the need for intermediaries reducing the time and cost associated with transactions This makes it an ideal solution for international trade remittances and other types of financial transactions especially in parts of the world where a great number of individuals do not have access to basic banking services Immutable Record One of the fundamental attributes of blockchain is its immutability Once data is added to the blockchain it becomes nearly impossible to alter or delete This feature ensures a tamper resistant and reliable record of transactions crucial for maintaining integrity in various industries including supply chain management and legal documentation Smart Contracts Blockchain technology supports the implementation of smart contracts which are self executing contracts with the terms of the agreement directly written into code This automation

streamlines processes and reduces the risk of fraud particularly in sectors like real estate and legal agreements

Interoperability Blockchain's ability to facilitate interoperability allows different blockchain networks to communicate and share information seamlessly This attribute is pivotal for creating a unified and interconnected ecosystem especially as various industries adopt blockchain independently Interoperability enhances efficiency reduces redundancy and fosters collaboration across diverse sectors

Leveraging Blockchain Technology Governance Risk Compliance Security and Benevolent Use Cases discusses various governance risk and control GRC and operational risk related considerations in a comprehensive yet non technical way to enable business leaders managers and professionals to better understand and appreciate its various potential use cases This book is also a must read for leaders of non profit organizations allowing them to further democratize needs that we often take for granted in developed countries around the globe such as access to basic telemedicine identity management and banking services
