**International Economics and Business** Sjoerd Beugelsdijk, Steven Brakman, Harry Garretsen, Charles van Marrewijk, 2013-08-01 With a new title following the successful first edition of Nations and Firms in the Global Economy this second edition undergraduate textbook combines the dual perspectives of international economics and international business providing a complete overview of the changing role of nations and firms in the global economy International Economics and Business covers the key concepts typically included in an introductory course on the global economy supported by contemporary case studies from the international business world The result is a practical guide to the world economy for undergraduate students in economics and business also suitable for students in other social science disciplines Updated to include the latest theoretical insights data and case studies with online quizzes data exercises and additional reading International Economics and Business is a lively and engaging textbook providing a complete and practical understanding of international economics and globalization through a uniquely integrated lens Reforming WTO Rules on State-Owned Enterprises Yingying Wu, 2019-01-28 This book argues that the trade distorting effects of advantages associated with SOEs are more severe from an economic perspective and the behavior of SOEs after receiving advantages is of more concern compared to private owned enterprises POEs The premise is that the existence of SOEs per se is not the essential problem rather the underlying problems are i the disproportionate granting of advantages to SOEs compared to POEs and ii the behavior of SOEs once they receive advantages The book offers a systematic analysis focusing on the various advantages granted to SOEs and their subsequent behavior Its detailed analysis reveals the inadequacy of current WTO rules and is complemented by a number of concrete proposals International Economics Paul R. Krugman, Maurice Obstfeld, Marc Melitz, 2011-11-21 This is the eBook of the printed book and may not include any media website access codes or print supplements that may come packaged with the bound book Nobel Prize winning economist Paul Krugman renowned researcher Maurice Obstfeld and new co author Marc Melitz of Harvard University continue to set the standard for International Economics courses with the text that remains the market leader in the U S and around the world International Economics Theory and Policy is a proven approach in which each half of the book leads with an intuitive introduction to theory and follows with self contained chapters to cover key policy applications Note This is the standalone book if you want the book and Access Card for MyEconLab order the ISBN below 013274483X 9780132744836 International Economics Theory and Policy plus MyEconLab with Pearson Etext Student Access Code Card Package Package consists of 0132146657 9780132146654 International 0132734524 9780132734523 MyEconLab with Pearson eText Access Card for International Economics **Compound Containment** Dong Jung Kim, 2022-03-07 When does a reigning great power of the international system supplement military containment of a challenging power by restricting its economic exchanges with that state Scholars of great power politics have traditionally focused on examining a reigning power s military containment of a

challenging power In direct contrast Compound Containment demonstrates that these conventional studies are flawed without a sound understanding of the multilayered aspects of containment strategy in great power politics Since economic capacity and military power are intimately linked to one another countering a challenging power requires addressing both economic and military dimensions Nonetheless this nexus of security and economy in a reigning power's response to a challenging power cannot be explained by traditional theories that dominate research in international security Author Dong Jung Kim fills a gap in the scholarship on great power competition by investigating when a reigning power will make its military containment of a challenging power compound by simultaneously employing restrictive economic measures Its main theoretical claims are corroborated by an analysis of key historical cases of reigning power challenging power competition This book also offers policy prescriptions for the United States by examining whether the United States is in a position to complement military containment of China with restrictive economic measures

**The Internet of Products** Robert Neumann, 2012-11-27 This study approaches the difficult problem of providing Internet users with a completely transparent view on electronic markets from a product information accessibility point of view Robert Neumann analyzes economic ecological and societal gains of openly accessible product information in the form of theoretical models Though many aspects of very different research disciplines have to be investigated to gain a holistic view on the Internet of Products this thesis reduces the range of involved research topics to product information discoverability related questions
